THE HONORABLE EDWIN W. EDWARDS
GOVERNOR OF LOUISIANA
MEMBERS OF THE LOUISIANA LEGISLATURE
MEMBERS OF THE STATE BOARD OF
ELEMENTARY AND SECONDARY EDUCATION

In accordance with the provisions of Louisiana Revised Statutes 17:22(6), I respectfully submit to you this One Hundred Thirty-Fifth Annual Financial and Statistical Report.

We hope that these statistical data, submitted to the Bureau of Research, Office of Research and Development, by the local systems and various sections within the Department of Education, will provide useful information for you and your respective offices.

Sincerely,

Thomas G. Clausen

Thomas G. Clausen

"An Equal Opportunity Employer"

PREFACE

> Knowledge is of two kinds: we know a subject ourselves, or we know where we can find information upon it.
>
> James Boswell

One of the prime functions of the Office of Research and Development in the Department of Education is to compile, analyze, and disseminate statistical and financial data relative to all aspects of elementary/secondary education in Louisiana.

In this endeavor, the Bureau of Research within the Louisiana Department of Education has compiled this 135th Annual Financial and Statistical Report for the 1983-84 school year.

It is hoped that this document will serve as a valuable, relevant, and timely source for information and provide the knowledge necessary for making informed decisions about education in our state.

The Bureau of Research is appreciative of the cooperation received from persons in the local school systems, the Department of Education, and other state agencies.

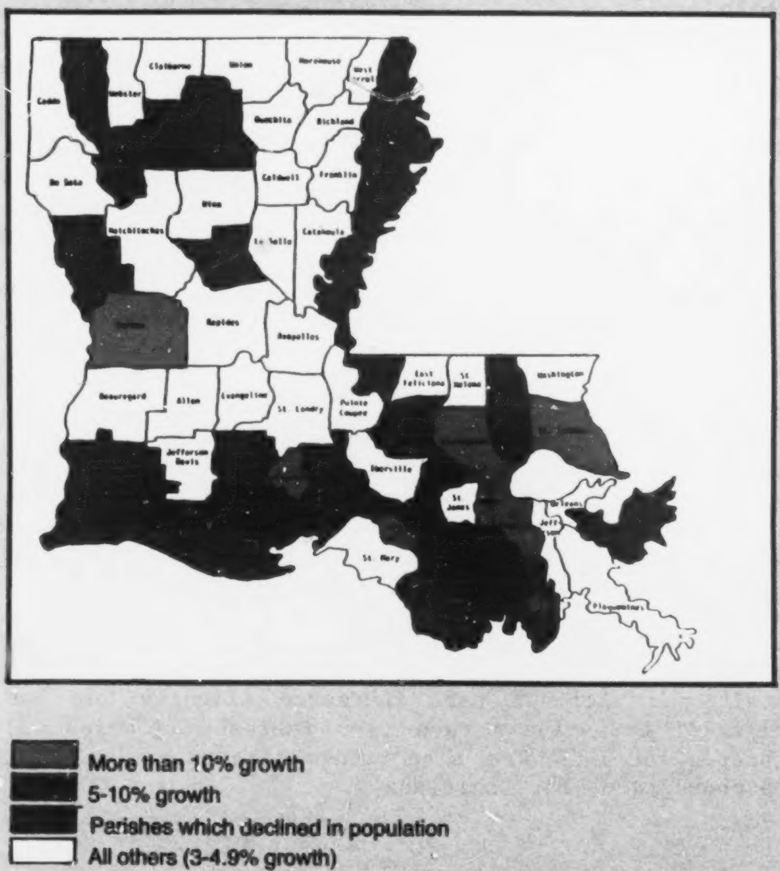
1. LOUISIANA POPULATION AND STUDENT ENROLLMENT

A. Population Characteristics

Louisiana experienced a continuous population growth during the decade of the 70s, partly because more people moved to Louisiana than left the State during that time. Too, Louisiana has traditionally had a higher birthrate than the rest of the nation. The first few years of the 80s have also been a period of growth for Louisiana, although at a lower rate. Figure 1.1 depicts estimated parish population changes from 1980 to 1983.

Figure 1.1 Parish Population Change 1980-83*



* 1983 figures based on estimates from the State Planning Office, March, 1984

While this population growth is both good for our state economy and for the future of education, it is not without its problems. A national government publication[1] indicated that the state's population increased 15.3 percent from 1970 to 1980, and the Louisiana State Planning Office has estimated a 5.56 percent growth rate for the period 1980 to 1983. Table 1.1 details the population growth of each parish in the state from April 1970 to April 1980 and from 1980 to 1983. It is interesting to note that 12 parishes grew in population more than 25 percent during the 1970-1980 decade and seven parishes grew more than 10 percent from 1980 to 1983. This amount of growth has major implications in future planning for these school districts.

Parishes along the banks of the Mississippi River from East Baton Rouge to Jefferson, as well as areas such as St. Tammany and Lafayette parishes, experienced large population increases. The growth appears to be attributed to two factors: increased industrialization and spillover from metropolitan into rural parishes. St. Tammany Parish, Livingston Parish, and more recently, St. John the Baptist Parish, claimed the largest increases.

Table 1.2 provides information on selected economic statistics of families in Louisiana. The average percent of families in poverty for Louisiana in 1979 was 15.5 percent, compared with 21.5 percent in 1969. Louisiana, therefore, experienced a 6.4 percent decrease in poverty-level families. The state average, however, remained above that of the U.S. average (although this difference has decreased from 10.8 percent in 1969 to 5.5 percent in 1979). The parishes with the lowest median family income generally correspond to those having higher poverty rates. These parishes are generally located in the northeast and central rural areas of the state. Parishes with the highest median family incomes are generally located in the southern, metropolitan areas of the state.

By comparing Louisiana and national educational statistics, one can determine the relative strengths and weaknesses of the state's educational system. Louisiana has a unique set of population characteristics, as can be seen in Tables 1.3, 1.4, and 1.5. Louisiana's birthrate has traditionally been among the highest in the nation. From 1960-74 the national birthrate dropped dramatically, and Louisiana's birth rate fell from the fifth highest to the eighth highest in the nation. In 1975, however, the national rate increased slightly but has since stabilized; Louisiana's rate also increased (Table 1.3). The birthrates for 1983 show a continued high rate--18.2 births per 1,000 population--for Louisiana.

Louisiana ranks fourth in the nation in percent of the population who are of school age (Table 1.4), while ranking forty-sixth in percent of the population aged 21 and over.[2] As a result of this demographic dispersion, Louisiana has 33.4 school aged children per 100 adults aged 21 and over, the sixth highest ratio in the nation in 1983 (Table 1.5). This large number of school aged children per adult places a heavy educational support burden on the adult population.

Traditionally, Louisiana has had a high rate of illiteracy. Based on Bureau of the Census estimates, Louisiana had a higher illiteracy rate than any other state in 1950, 1960, and 1970. In 1980, 7.8 percent of the Louisiana adult population was functionally illiterate or lacking a fifth grade education, compared with a national average of only 3.4 percent. However, also in 1980, Louisiana ranked slightly better in median school years completed by persons 25 years and over, percent of persons 25 years and over who have had at least four years of high school, and percent of the population having four or more years of college; nevertheless, the State still ranks in the lower quarter of the nation in these categories (Table 1.5).

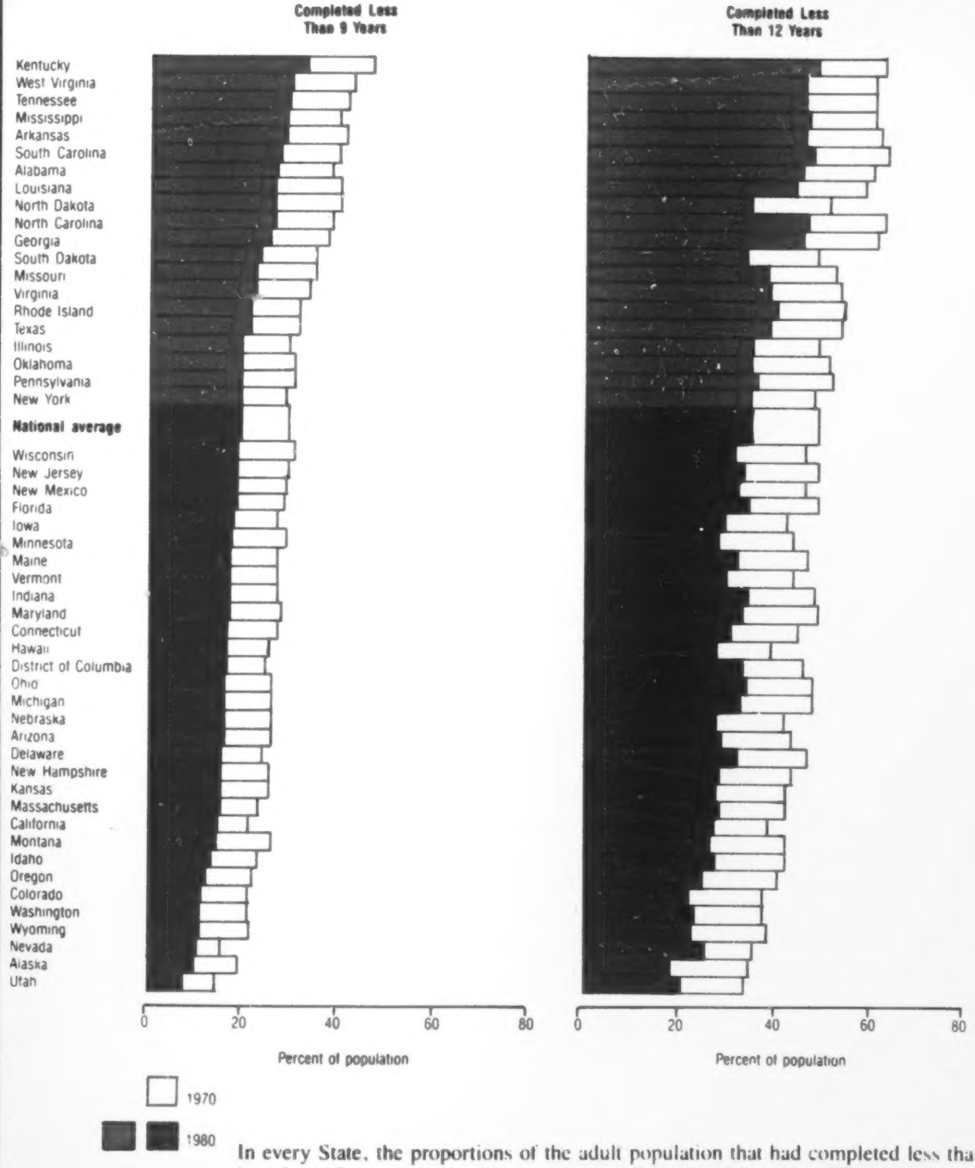
Figure 1.2 depicts the percentages of persons 25 years old and over with less than 9 and less than 12 years of school completed, by state. According to this chart, Louisiana ranks relatively high in the number of these persons.[3]

B. Student Enrollment: Trends and Current Statistics

Student registration trends are presented in Table 1.6. A small decline in public enrollment occurred each year from 1974-75 to 1982-83 (except for a small increase in 1975-76). In 1983-84, however, total public registration increased by approximately .50 percent over the previous year. The nonpublic school population, relative to public enrollment, has been stable during this period, with a range of 15.21 percent to 16.29 percent of the school aged children of our state. Approximately 87 percent of the students in nonpublic schools in 1974-75 were white, decreasing somewhat to 82 percent in 1983-84. The public schools had approximately 60 percent white enrollment in 1974-75 and approximately 56 percent white enrollment in 1983-84.

School year 1980-81 was the first year that accurate data on the number of Hispanic, Asian, and Indian Americans in Louisiana schools were gathered. In the 1983-84 school year, there were 18,878 students from these other ethnic groups in the public school system and 2,558 in the nonpublic school system.

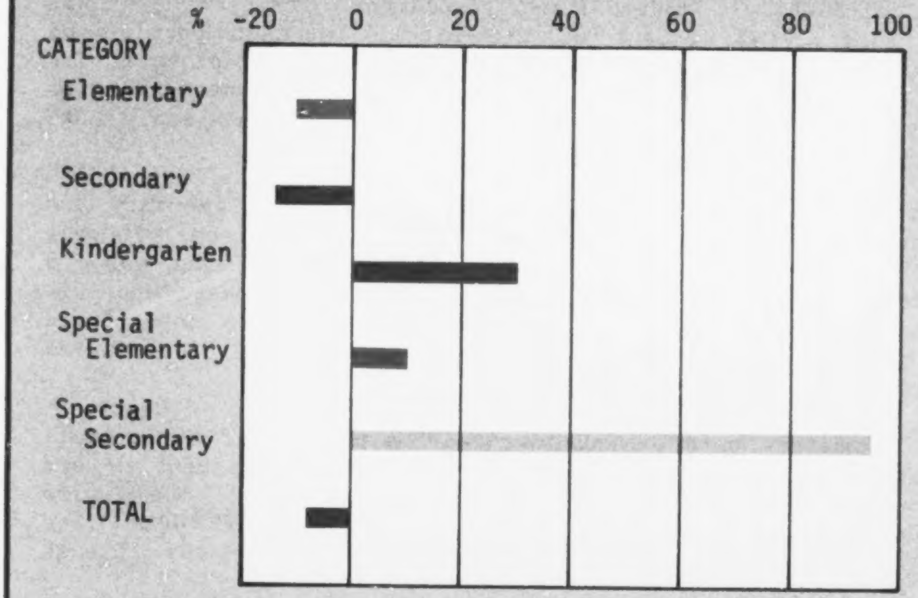
Figure 1.2 Persons 25 Years Old and Over with Less Than 9 and Less Than 12 Years of School Completed, by State



In every State, the proportions of the adult population that had completed less than 9 or less than 12 years of school were substantially reduced between 1970 and 1980.

Total student registration (public and nonpublic) from Fall 1974 to Fall 1983 in regular and special education categories is presented in Table 1.7. Figure 1.3 represents the percent change in the last 10 years for student registration in each category.

Figure 1.3 Percent Change in Total Louisiana Student Registration 1974-75 to 1983-84



As noted in Table 1.7, there is a decrease in student registration each year during this period (except for a small increase in 1983-84) when the students in special education and kindergarten are removed from the population. The overall 10-year decrease of 10.8 percent in regular elementary and secondary education was composed of two similar trends during the period: elementary enrollment dropped considerably, 10 percent, while secondary enrollment dropped 12.8 percent. (See Table 1.8 for complete information on registration per grade level in 1983-84.)

During the late 1970s decade and the early 1980s, the drop in elementary enrollment was a function of the decrease in birthrates during the 1960s and early 1970s, while the stability in secondary enrollment reflected the higher birthrates of the 1950s and early 1960s. It should be noted, however, that enrollment in secondary education peaked in school year 1976-77 and has since shown the steady decline that elementary schools showed in the 1970s. Conversely, elementary enrollment figures should begin increasing in the mid to late 1980s as a function of the increased birthrates of the late 1970s. In fact, 1983-84 figures do reflect a small increase in elementary enrollment. Table 1.8 presents student enrollment projections through 1987-88.

There was a large increase in kindergarten and special education enrollment during the past decade. Kindergarten enrollment expanded by 31.4 percent from school year 1974-75 through school year 1983-84. Kindergarten enrollment for 1983-84 was approximately 8 percent of the overall student population. Figure 1.4, taken from a national publication, displays public preprimary enrollment as percent of first grade enrollment for each state.[4] According to this figure, Louisiana ranks relatively low in this percentage.

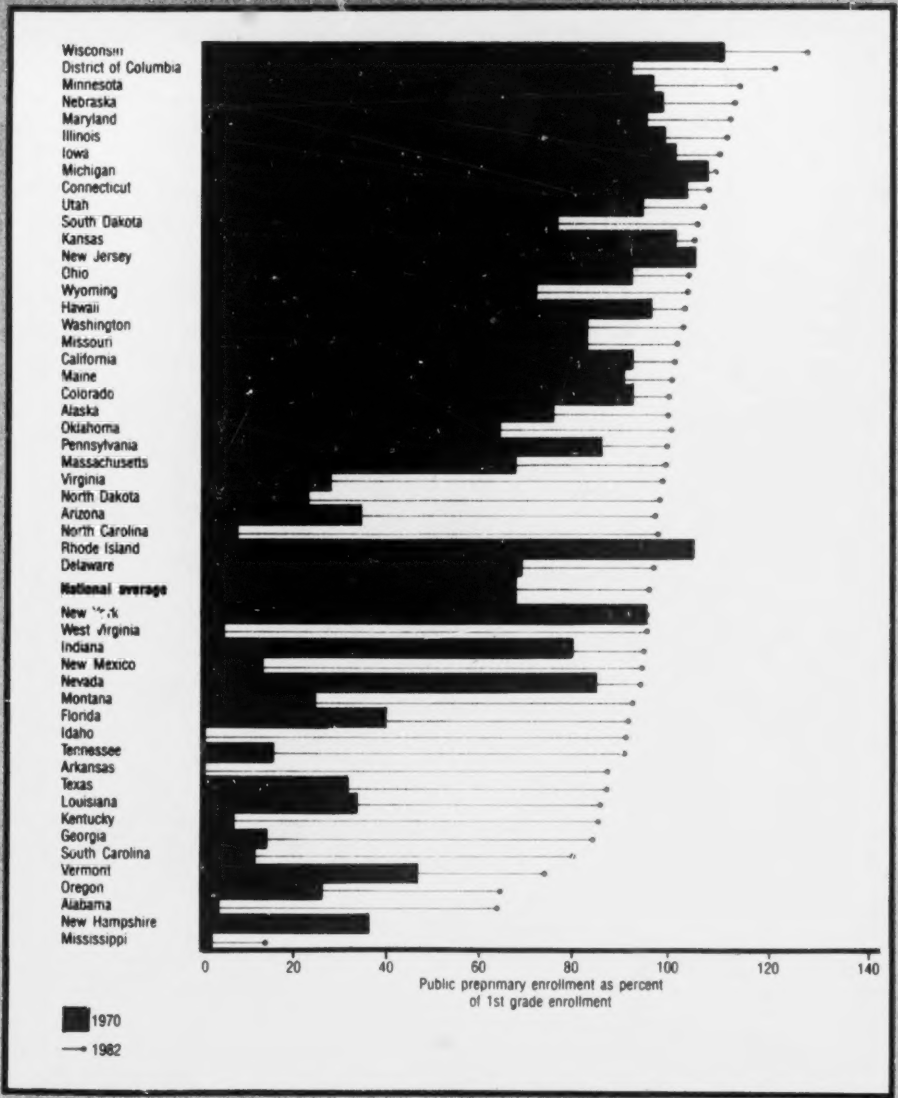
Enrollment in special education classes, both elementary and secondary, increased dramatically during the same 10-year period. The increase in elementary special enrollment was 9.9 percent, while secondary special enrollment increased approximately 94 percent. Students in special education constituted 3.8 percent of the total student population in 1983-84, compared with only 2.8 percent of the total in 1974-75.

The Louisiana Board of Regents predicts that after the overall decrease in total enrollment during the late seventies and through school year 1982-83, a reverse trend will begin with modest increases occurring in 1983-84 through 1987-88. (See Table 1.8 for enrollment projections by grade level through 1987-88.)

Table 1.9 details trends in average daily membership and average daily attendance. From 1974-75 to 1983-84 average daily membership fell 8.1 percent, corresponding to the average daily attendance decrease of 5.8 percent. These two percentages should fluctuate at about the same rate; however, the 2.3 percent disparity is accounted for in the 2.3 percent increase in percent attendance of membership for the same period.

Enrollments for vocational education programs from 1973-74 through 1983-84 are found in Table 1.10. The majority of the secondary students counted in Table 1.10 are in city/parish school systems. Total enrollment in vocational education

Figure 1.4 Public Preprimary Enrollment Compared to 1st Grade Enrollment



programs in 1983-84 equalled 225,050 students. Figure 1.5 depicts the number and types of vocational units reported by high school graduates in a national report.[6]

Vocational Education Amendments of 1976 (Public Law 94-482) mandated new vocational activities including a displaced homemakers' program, the establishment of a sex equity coordinator's position, and special vocational education programs for handicapped persons. The displaced homemakers' program now has seven centers in operation. Vocational programs for students with limited English speaking skills were also initiated in Louisiana during the decade.

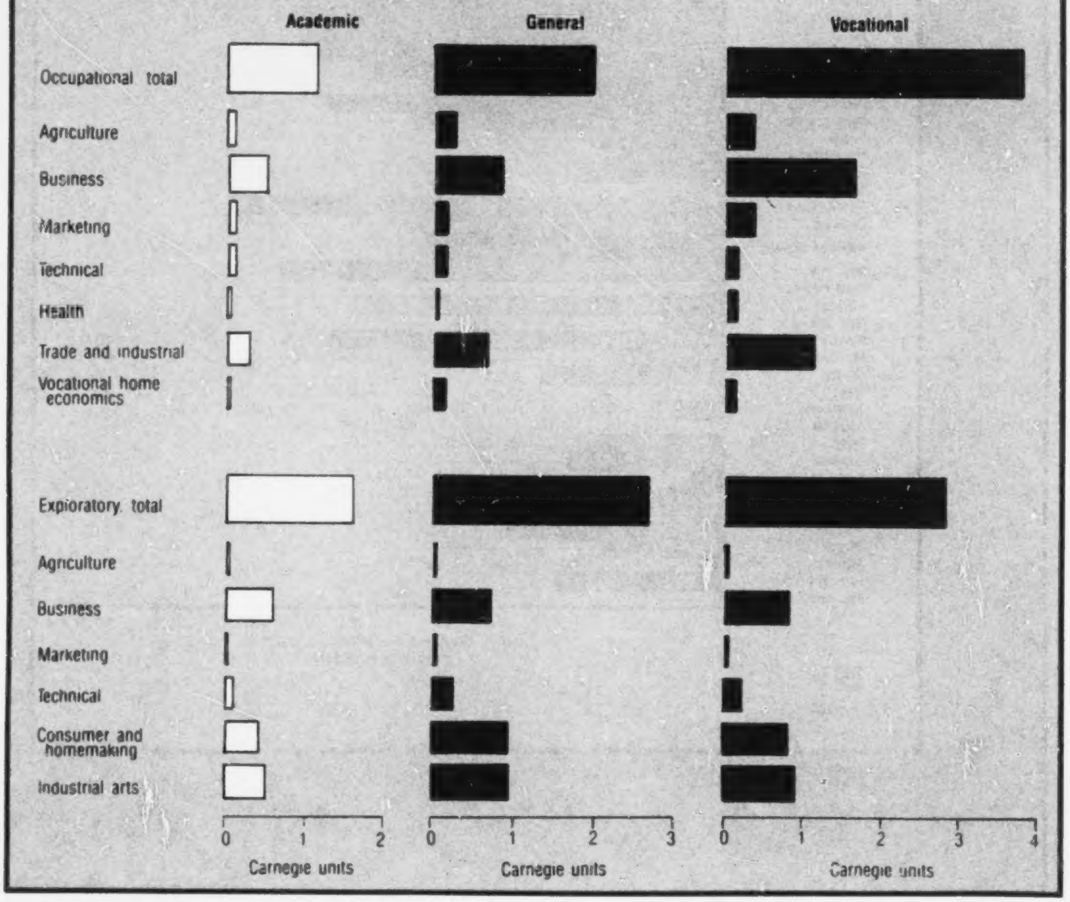


Figure 1.5 Average Units Earned by U.S. Public High School Graduates in Selected Vocational Courses, 1982

Adult education continued to play an important role in Louisiana education during the last four years; 11,211 students received the general equivalency diploma in 1980, 12,230 in 1981, 11,842 in 1982, 10,867 in 1983, and 10,022 students in 1984.[8] Enrollment in Louisiana Adult Basic Education and R.S. 17:14 Adult Education programs has increased 44.6 percent since 1974-75, with 45,896 participants actually enrolled in 1983-84. See Table 1.11 for further summary information on enrollment, achievement, and termination of students in adult education from 1974-84.

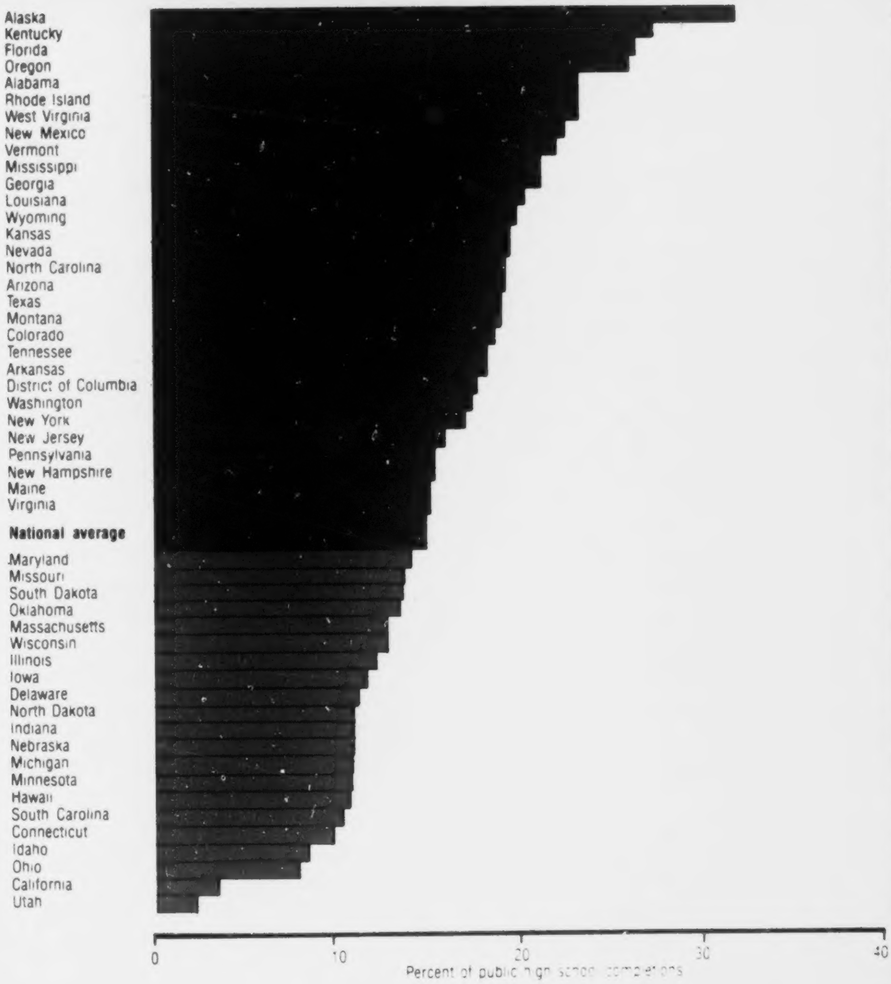
Figure 1.6 depicts GED recipients as percent of public high school completions, by state for the 1979-80 school year.[9] According to this chart, NCES estimated a national average of 14.9 percent of public high school completions as GED recipients, compared with an average of 20.1 percent for Louisiana.

The past decade was characterized by significant increases in the student population enrolled in special education classes. There was an increase of 27.5 percent (from 28,056 in 1974-75 to 35,762 in 1983-84) in the number of students enrolled in special education classes in public schools. This increase tells only part of the story, however, since that population includes only those students in self-contained classrooms. According to figures gathered for the minimum foundation program's equalization distribution, there were 91,762 students enrolled in all types of special education classes at the end of the first reporting period in 1983-84. In addition to those students in self-contained classrooms, this figure includes 16,732 students enrolled only in speech therapy and 34,618 enrolled in resource special education classrooms. (See the Louisiana State Profile for a breakdown of the special education students by type of class in 1983-84.)

The passage of Public Law 94-142 (Education for All Handicapped Children Act) by Congress in 1975 was, to a large degree, the impetus behind the expansion of special education in the state. The law calls for individualized schooling for all physically, mentally, and emotionally handicapped students. Revised Statute 17:1941 et seq., beginning with Act 754 of the 1977 Regular Session of the Louisiana Legislature, encompasses Louisiana's State regulations in compliance with P.L. 94-142; the Act was implemented in the local school systems in September 1978.

One immediate effect of this emphasis on special education was a dramatic increase in the number of evaluations carried out each year. According to a report on special education by PAR published in 1973,[11] there were 8,863 evaluations of children for special education purposes in school year 1972-73. In 1983-84 the Office of Special Education referred 26,654 initial evaluations and 26,125 re-evaluations.[12] Additionally, 11,425 students received pupil appraisal support services in this year.

Figure 1.6 GED Recipients as Percent of Public High School Completions, 1980



GED recipients comprised approximately 15 percent of all public high school completions in school year 1979-80. Their representation among completions ranged from 32 percent in Alaska to under 2 percent in Utah.

The number of children in the gifted and talented category increased from 698 in 1975-76 to 12,941 in 1983-84 according to estimates from the Office of Special Educational Services. Other significant developments in special education in the past decade included: (1) the establishment of statewide standards for the evaluation of each child (contained in the Pupil Appraisal Handbook, Bulletin 1508) in October 1978; and (2) the introduction of a nondiscriminatory intellectual achievement testing program [the System of Multicultural Pluralistic Assessment (SOMPA)] for placement in special education.

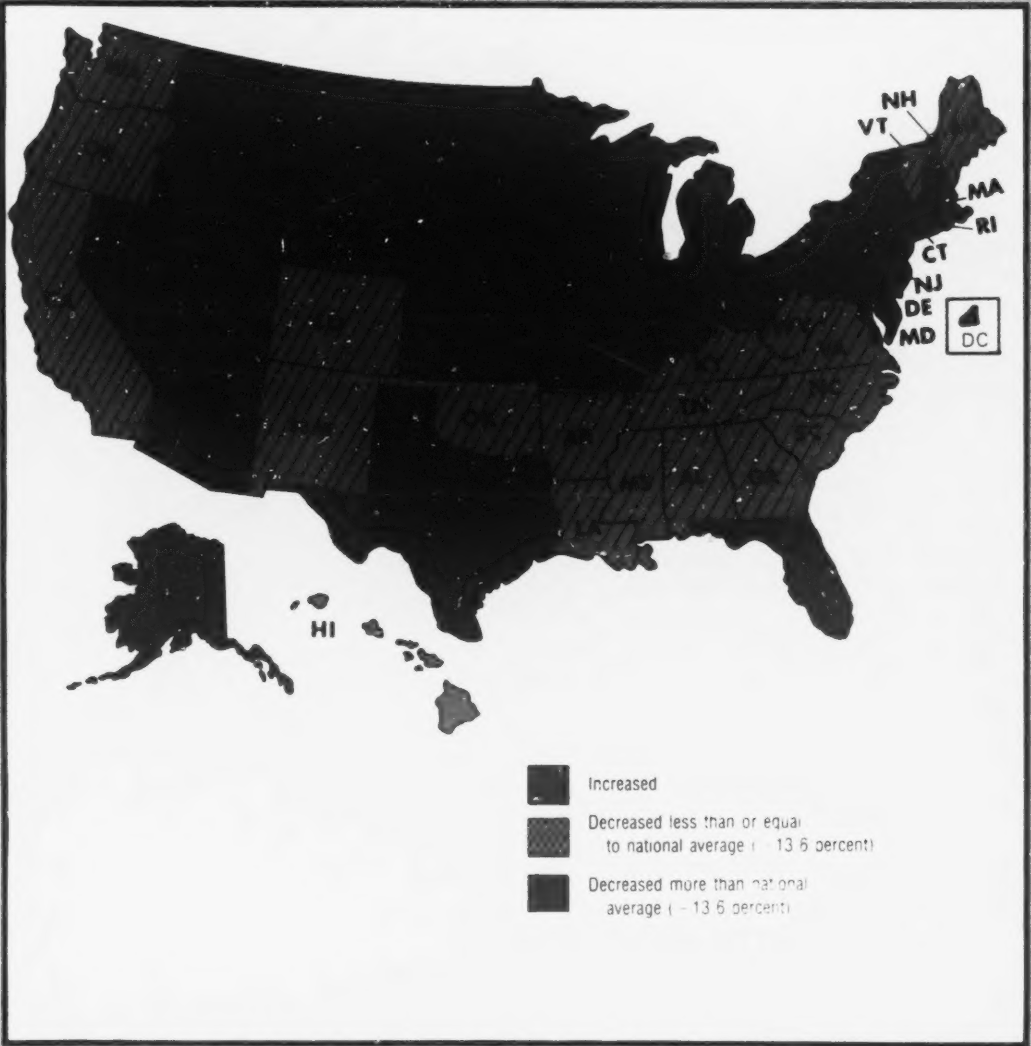
C. Louisiana and the Nation

Nationally, the absolute number of pupils in school peaked in 1970 and declined after that because of the lowered birthrate in the 1960s and early 1970s. Louisiana has followed this national trend: there has been a decrease in the absolute number of pupils in elementary and secondary schools (excluding kindergarten and special education) each year from 1970-71 through 1982-83.

Louisiana's recent enrollment figures are compared with national figures in Table 1.12. The state's public school enrollment was the seventeenth largest in the nation in 1983, and the state ranked fifth (1981) in percentage of students in nonpublic schools, behind only Pennsylvania, Hawaii, Delaware, and the District of Columbia. The state ranks low, however, in average daily attendance as a percent of either enrollment (42nd) or average daily membership (39th). The State had three of the nation's 60 largest public school systems according to a recent report:[13] (a) Orleans Parish ranked 25, (b) East Baton Rouge Parish ranked 40, and (c) Jefferson Parish ranked 44.

The National Center for Education Statistics[14] presented results from comparing public school average daily attendance for the school years ending 1970 and 1977: Louisiana had an overall percent change of +0.8 percent during this period, while the national percent change was -2.6 percent. Thus, Louisiana's losses in public school enrollment and attendance during this period of national decline were equal to or slightly less than the national average. (The procedure used by NCES was different from that used by the Louisiana Department of Education to calculate the average daily attendance figures presented here in Table 1.9.) Figure 1.7 represents percent changes for each state in public elementary/secondary school enrollment between 1970 and 1982.[15] According to this estimate, Louisiana's public school enrollment decreased less than or equal to the national average (-13.6 percent) for that period.

Figure 1.7 Percent Change in Public Elementary/Secondary School Enrollment Between 1970 and 1982, by State



NH
VT

---

[a] The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data, resulting in an undercount of nonpublic students.

[b] Four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, no nonpublic students from these districts are included in the compilation of the totals for this year.

[c] Three districts (Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1983-84 school year. No nonpublic students from these districts are included in the compilation of the totals for this year.

[d] 1979-80 was the first year that districts were asked to report the number of Hispanic, American Indian and Asian students who were registered in their schools. Some districts noted difficulty in reporting this information, so there is probably an undercount of students from these ethnic groups for this year.

TABLE 1.7

PUBLIC AND NONPUBLIC STUDENT REGISTRATION IN ELEMENTARY, SECONDARY, KINDERGARTEN, AND SPECIAL EDUCATION, 1974-84

Year	Elementary	Secondary	Total Elementary and Secondary	Kindergarten	Special Elementary	Special Secondary	Total All Categories

[a] The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data, resulting in an undercount of nonpublic students. The actual registration data for 1983-84 for both public and nonpublic schools do not include kindergarten or special education students.

[b] These totals do not include students in kindergarten or special education. The total figures for the projections for grades 2-12 do not equal the combined projections for public and nonpublic schools. The reason for this is that each phase of the model--public, nonpublic, total--uses numbers relative to that phase only. The projections for 1984-88 were made by Mr. Larry Goux of the Louisiana Board of Regents. His projections exclude kindergarten and special education students.

[b] Rankings include the 50 states and the District of Columbia.

Chapter 2

2. PUPIL CHARACTERISTICS

A. Retention Rates and Dropout Statistics

Table 2.1 presents a comparison of Louisiana and national pupil retention rates from the fifth grade through high school graduation. Over the last five selected years, Louisiana retained only 63.8 percent of its students in public and nonpublic schools as compared with a national retention rate of 74.4 percent. This low retention rate explains why Louisiana ranked below the national average in percent increase in number of public high school graduates from 1976-82 even though the State was ranked high in percent of the population who were school-aged during that period.

Trends in Louisiana school dropouts are presented in Table 2.2. Excluding the 1982-84 school years, the percentage of students who drop out of public schools did not change significantly over the decade, with the range being from 1.87 percent in 1981-82 to 2.27 percent in 1973-74. Beginning in 1982-83, a new computerized reporting system was implemented to report dropouts. It is likely that the large decrease in dropouts reported for the 1982-84 school years is at least partially dependent on errors in this new reporting system. The state supervisors of Child Welfare and Attendance speculate the decrease may also be due to state support of Child Welfare and Attendance personnel, sound educational programs over the past seven years, child adjustment and case study services, state assistance with child advocacy, and other reasons.

Although fewer in number than white students enrolled in our public schools during the past decade, black students accounted for a significantly higher dropout percentage. However, this disparity decreased over the years (Table 2.2) and in fact, in 1980-81 and 1981-82 the percent of black and white dropouts was proportionate to the percent of black and white enrollment. In the 1982-83 school year, the percent of dropouts who were nonwhite was actually somewhat less than the percent of registration who were nonwhite. Since data on ethnicity of the dropouts were incomplete for 1983-84, no information for this year will be given.

B. Suspension and Expulsion Statistics

Tables 2.3 and 2.4 depict suspension and expulsion data for black and white students. Approximately 44 percent of the students in Louisiana public schools are nonwhite; however, 59 percent of suspended students are nonwhite, and 66.4 percent of expelled students are nonwhite. This continues a pattern of higher suspension and expulsion rates for nonwhites than whites that has existed for a number of years. Also, the percent of nonwhite students that are suspended increases as the number of suspensions per student increases: 61.7 percent of second suspensions are nonwhite, while 66.5 percent of third or more suspensions are nonwhite.

Table 2.4 describes the most frequent reasons for suspension or expulsion. During the 1983-84 school year, the most frequent reasons for suspension or expulsion were fighting students and/or faculty (19.8 percent), disrespect for authority (14.6 percent), and disturbance of classroom/campus (12.0 percent).

C. Graduates, National ACT and SAT Data

While total student registration showed a steady decline from school year 1974-75 through school year 1981-82, the absolute number of high school graduates per year remained fairly constant over that period. However, the 1982-84 figures reflect a marked decrease in the total number of high school graduates. Part of this decrease may be attributed to lower secondary registration figures and a possible undercount in nonpublic graduate data. There will be a trend toward larger graduation figures in the next decade as the larger elementary classes move into secondary grades. Public school graduates constituted a steady 84-87 percent of the total number of graduates over the past 10 years. Black students constituted 31.2 percent of the total graduates in 1974-75 and 35.7 percent of the total graduates in 1983-84. See Table 2.5 for more details about the number of high school graduates in Louisiana during this period. Information on the number of students receiving general equivalency diplomas was presented earlier in the narrative (see Chapter 1, Adult Education).

Figure 2.1 depicts those states using or expected to use minimum competency listing as part of high school graduation requirements.[16] Louisiana is one of 22 states in this category. The state board of elementary and secondary education has adopted the policy which states that beginning with school year 1986-87 and thereafter, eleventh grade students must pass the Basic Skills/Functional Literacy Test in addition to meeting the minimal graduation requirements.

As shown in Table 2.6, data supplied by the American College Testing (ACT) program indicate that nationwide ACT scores stayed fairly steady across the decade, ranging from 18.3 to 18.6. In Louisiana, there was a decrease from 17.1 in 1974-75 to 16.2 in 1982-83. The Louisiana score improved to 16.6 in 1983-84.

A 1980 report by the Louisiana State Board of Regents[17] compared the ACT scores and high school gradepoint averages of first-time college freshmen in Louisiana with national scores. Although declining ACT scores have been accompanied nationwide by increased high school gradepoint averages, the Board of Regents found grade inflation in Louisiana to be below the national average for the period reviewed. High school averages in Louisiana for first-time freshmen went up 10 percent between 1969 and 1978, compared with a national increase of 16 percent. The mean high school average of Louisiana first-time freshmen who took the ACT in 1978 was 2.81 (on a four-point scale), compared with the national average of 2.99.

Not only do the ACT data reveal information concerning student performance in verbal and computational skills, but also they present information on student satisfaction with various aspects of high school education. Table 2.7 compares Louisiana student satisfaction with national student satisfaction with regard to specific aspects of high school programs.

Testing used for high school graduation
Testing used for all other purposes

In 1983, 22 States used or expected to use minimum competency testing for high school graduation, and another 18 States used it for other purposes.

Among the areas receiving the highest rating by Louisiana students were classroom instruction, guidance services, library or learning centers, number and kinds of tests given, and grading practices and policies. The highest percentages of dissatisfaction were found in the number and variety of courses, school rules, regulations, policies, and laboratory facilities. Louisiana students were more satisfied than the national sample in nine of the 11 areas.[18]

Comparative figures on the SAT (Scholastic Aptitude Test) present a different trend. As indicated in Table 2.8, Louisiana students scored well above the national average on the SAT from school year 1974-75 to school year 1983-84. The mean composite score for Louisiana students in 1983-84 was 980 compared with the national score of 897.

The contradiction in ACT and SAT national comparisons may be explained by differences in the student populations taking the two tests in Louisiana. Louisiana has one of the most liberal policies for admission to college in the nation, and the State requires that all freshmen take the ACT (see Figure 2.2 for state university requirements, by state[19]). Consequently, more students with marginal chances of success in college take the ACT in Louisiana than do nationwide. On the other hand, only those students going to out-of-state universities and in-state private universities take the SAT, while all freshmen take the test in certain areas of the country.

The U.S. Department of Education recently released (December 1984) information on the percent of high school graduates who took the ACT in 1983-84 for each of the 28 states who predominantly used the ACT for college admission.[20] Out of the 28 states, Louisiana ranked second with an estimated 77.9 percent of its high school graduates taking the ACT. An inverse relationship appeared to exist between this percentage and the average ACT score, as Louisiana was ranked 27 (out of 28) on average ACT score for the same year.

[a] Source: Dropout data reported here were collected by the Bureau of Student Services in the Louisiana Department of Education. Enrollment data from which percentages were calculated were taken from Annual Reports of the Louisiana Department of Education. The percentages were calculated by the Louisiana Department of Education.

[b] Dropout data for 1980-81 were not available for Natchitoches Parish. Registration data from Natchitoches Parish were not included in calculation of the percent of total registration who drop out.

[c] From 1973-80, dropout and registration data were reported by white and black categories only. From 1980-82, dropout data were reported by white and black categories, while registration data were reported for five different ethnic groups. The sum of the percent of registration for these two years does not equal 100 percent in this table, because some of the registered students were classified as other race. Starting with 1982-83, both dropout and registration data were reported for five different ethnic groups, and the data reported here were divided into white and nonwhite categories.

[d] A new computerized system for reporting dropout data was implemented by the Bureau of Student Services in school year 1982-83. Some districts experienced difficulty in converting from the old manual system to the new automated one. This may have resulted in an undercount of dropouts in some districts for school year 1982-83. For example, Winn and Caldwell parishes reported no dropouts for 1982-83.

[e] According to the Bureau of Student Services, six districts (Caddo, Caldwell, East Baton Rouge, Franklin, Vernon, and Winn) reported dropouts after the cut-off date for reporting. These late reports constituted 3,040 of the 12,337 dropouts (24.6%). The Bureau of Student Services did not require these districts to report the ethnicity of the dropouts in these late reports, so the partial ethnicity data will not be reported here.

TABLE 2.3

COMPARISON OF WHITE AND NONWHITE SUSPENSION AND EXPULSIONS, PUBLIC SCHOOLS, 1983-84[a]

Category	White Frequency	Percent of Total That are White	Nonwhite Frequency	Percent of Total That are Nonwhite	Total Frequency
Public School Registration	444,222	55.7	352,823	44.3	797,245
Number of Students Suspended	24,175	41.0	34,732	59.0	58,907
Number of Suspensions	35,181	39.5	53,869	60.5	89,050
Days Suspended	79,324	35.5	144,223	64.5	223,547
Suspended Second Time	7,141	38.3	11,480	61.7	18,621
Suspended Three or More Times	3,865	33.5	7,657	66.5	11,522
Expelled	553	33.6	1,094	66.4	1,647

[a] The suspension and expulsion data reported here were collected by the Bureau of Student Services in the Louisiana Department of Education. The percentages were calculated by the Bureau of Research, Louisiana Department of Education. According to the Bureau of Student Services, three districts (Franklin, Winn and Bogalusa) reported a small number of suspensions (0.5% of the total) after the cut-off date for reporting. Since these late suspensions were not coded in the categories found in this table, they were not included.

TABLE 2.4

MOST FREQUENT REASONS FOR SUSPENSION OR EXPULSION, 1983-84[a]

	Reason	Frequency	Percent of Total
1.	Fighting Students and/or Faculty	22,725	19.8
2.	Disrespect for Authority	16,717	14.6
3.	Disturbance of Classroom/Campus	13,738	12.0
4.	Cutting Class/Leaving Campus	10,746	9.4
5.	Excessive Tardiness and/or Absence	8,635	7.5
6.	Other[b]	41,928	36.7
	Total	114,489	100.0

[a] Source: Suspension and expulsion data reported here were collected by the Bureau of Student Services in the Louisiana Department of Education. The percentages were calculated by the Bureau of Research, Louisiana Department of Education.

[b] Other includes 15 additional reasons for suspensions and expulsions including threatening student and/or faculty, habitual violations of school rules, drugs, alcohol, etc.

[a] The Bureau of Research depends on the voluntary reporting of nonpublic graduates by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data, resulting in an undercount of nonpublic graduates. For example, five districts (East Baton Rouge, Franklin, Jefferson, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic graduates for the 1983-84 school year. Therefore, the number of graduates for these five districts is reported as not available for 1983-84.

[b] Includes graduates from summer and midterm.

[c] 1979-80 was the first year that the districts were asked to report the number of Hispanic, American Indian and Asian high school graduates. Some districts noted difficulty in reporting this information, so there is probably an undercount of graduates from these ethnic groups for this year.

Chapter 3

3. STAFF CHARACTERISTICS

A. Professional and Nonprofessional Personnel

There was an overall increase in both the professional and nonprofessional staffs of the public schools from 1974-75 to 1983-84, as indicated in Table 3.1. The professional staff increased by 7.66 percent during this period, while the nonprofessional staff increased by 13.4 percent. The percentage of professional staff within public schools ranged between 58.3 percent and 59.8 percent during this period.

A more detailed breakdown of professional and nonprofessional personnel in the public school system is presented in Table 3.2. Slightly under 50 percent of all the staff in the public school system are full-time classroom teachers. Louisiana has traditionally had one of the highest percentages of nonprofessional staff personnel in the nation (Table 3.9), and this trend has continued through 1983-84. Approximately 43 percent of the public staff in 1983-84 were nonprofessional, with service workers (19.7 percent) and office/clerical workers (12.8 percent) constituting the largest categories.

Trends in professional and nonprofessional personnel in the nonpublic school system from 1971-80 can be found in the 131st Annual Report of the Louisiana Department of Education. Starting with school year 1980-81, a new format for reporting nonpublic school personnel was initiated. Data for the 1982-83 and the 1983-84 school years were not reported, as the information from local school districts was incomplete.

B. General Characteristics of Instructional Staff

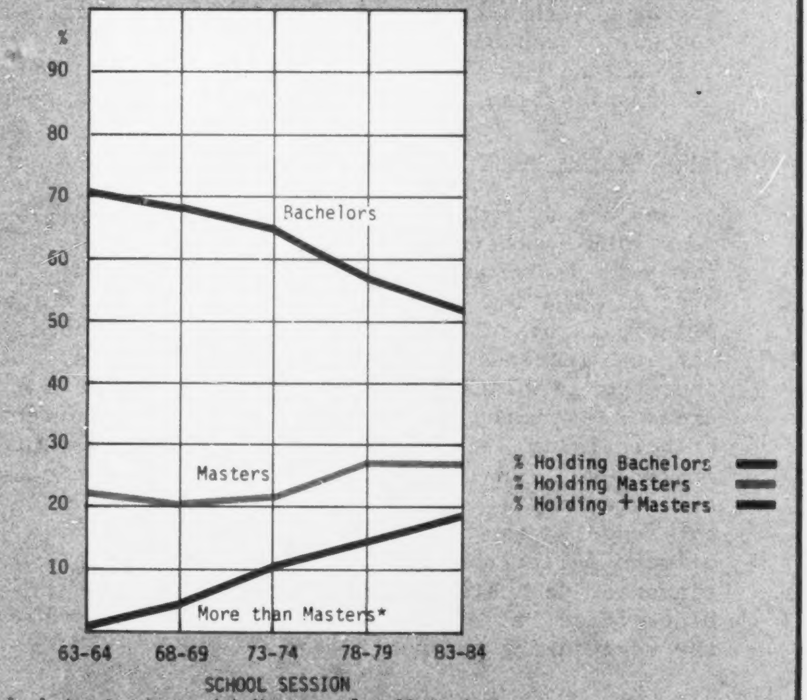
As indicated in Table 3.3, from school year 1974-75 to school year 1983-84 there were changes in the ratios of sex and race for principals and classroom teachers in the public school system. The 8.2 percent decline in percentage of white male principals over this period was mainly accounted for by a 0.7 percent increase in black male principals, a 1.5 percent increase in black female principals, and a 5.8 percent increase in white female principals. The percentage of male principals in 1974-75 was 85.4 as compared with 77.8 percent in 1983-84. In 1974-75, 74.9 percent of the classroom teachers were female, and this figure had increased to 80.3 percent by school year 1983-84. Thus, the inverse relationship between percentage of male principals and percentage of male classroom teachers continued unabated during this period. The black-white ratio of classroom teachers stayed approximately the same during the past decade.

For the 1983-84 school year, approximately 64 percent of Louisiana's full-time teachers were classified at the elementary school level which includes, generally, teaching assignments from kindergarten through the eighth grade. Approximately 19 percent of the elementary teachers in Louisiana were classified as special education teachers, and just over 2.5 percent as compensatory education teachers.

C. Training and Experience

The professional training of the public school instructional staff changed considerably during the period from 1974-75 to 1983-84 as indicated in Table 3.4. The number of teachers and principals with less than a college education decreased from 1.37 percent of the total to only .46 percent while the number with only a bachelor's degree decreased from approximately 64 percent to 53.8 percent of the total instructional staff. Conversely, the number with more than four years of college (including either a master's degree, master's plus 30 graduate hours, specialist in education, Ed.D. or Ph.D) increased dramatically from 34.6 percent of the total in 1974-75 to 45.7 percent in 1983-84. Figure 3.1 illustrates the changes in levels of professional training for the past 20-year period.

Figure 3.1 Professional Levels of Training for Instructional Staff, 1963-1983, Louisiana



* Includes teachers with Masters plus 30 Graduate Hours, Specialist in Education, Ph.D., or Ed.D.

Table 3.5 presents the total experience of teachers and principals in the public school system from 1974-75 to 1983-84. The number of teachers and principals with fewer than five years of experience decreased from 28.3 percent of the total in 1974-75 to 20.0 percent in 1983-84. On the other hand, the number of teachers and principals with five to nine years of experience increased slightly from 23.8 percent of the total to 24.8 percent, and the number with 10 to 14 years of experience increased from 16.9 percent to 21.6 percent. Thus, instructional staff with five to 14 years of experience increased from 40.7 percent in 1974-75 to 46.4 percent in 1983-84. It would appear that attrition is likely to occur within the first five years of teaching. If teachers remain in the profession after this time, they are apt to stay until 20 or more years of service have been completed. Using figures compiled in the Bureau of Research, the average total years of experience for 1983-84, full-time teachers in Louisiana were approximately 11.5. In 1982, NEA estimated the national median years of experience for teachers to be 12.[21]

D. Salaries

The annual salaries of principals and teachers in the public school system increased each year from 1974-75 to 1982-83. This trend is presented in Table 3.6. However, in 1983-84, the average teacher's salary actually decreased slightly (.1 percent) from the previous year, while the principal's average salary only increased by approximately 1.1 percent. The average teacher's salary increased approximately 93.8 percent since 1974-75 (from $9,792 to $18,399 in 1983-84), compared with an approximate 93.4 percent increase for principals (from $15,450 to $29,883 in 1983-84). Salaries for black teachers were slightly higher over this period than those for white teachers. This is probably a result of the longer average experience of black teachers in the public school system, (according to unpublished data compiled by the Bureau of Research). Figure 3.2 illustrates the percent change over the previous year in the average Louisiana teacher's salary, 1973-74 to 1983-84.

Teachers' salaries, as compared with industrial salaries, continue to be significantly less. According to a February 14, 1982, story in the Baton Rouge Sunday Advocate, area industry pays a nonsupervisory employee in the range of $24,000 a year plus fringe benefits, including paid vacation, and employees in many plants are able to boost their income by means of overtime pay. By contrast, this same news story stated that an average Baton Rouge teacher with 10 years of experience earns about $16,000 for nine months of work, with nonpaid vacations. A more recent article in Education USA (September 1984) discussed current research findings on starting salaries for teachers.[22] The article listed average starting salaries for several positions; some of those listed were librarian, bus driver, plumber, social worker, sanitation worker, laboratory technician, and various professional positions. The teacher's average starting salary was, by a significant amount, the lowest one of the 15 positions listed. The issue of teacher shortage is clearly related to salary. Opportunities, particularly in the areas of industrial arts, math, and science, exist in industry.

Figure 3.2 Percent Change from Previous Year of Average Annual Salaries for Louisiana Teachers

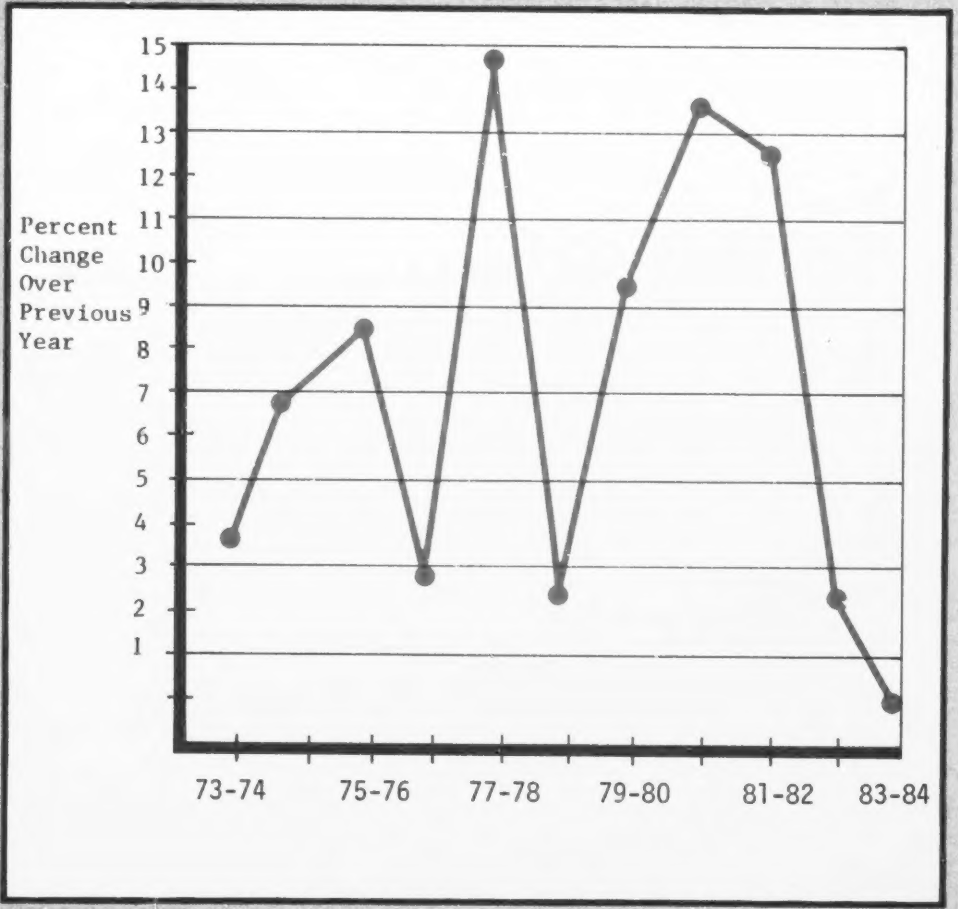


Figure 3.3 illustrates average teacher salaries in constant vs. current dollars.[23] When adjusted for inflation, the average salary of public school teachers generally declined throughout the 1970s. The disparity between constant and current dollars for average salaries has decreased during the early 1980s because of much lower inflation rates during that period.

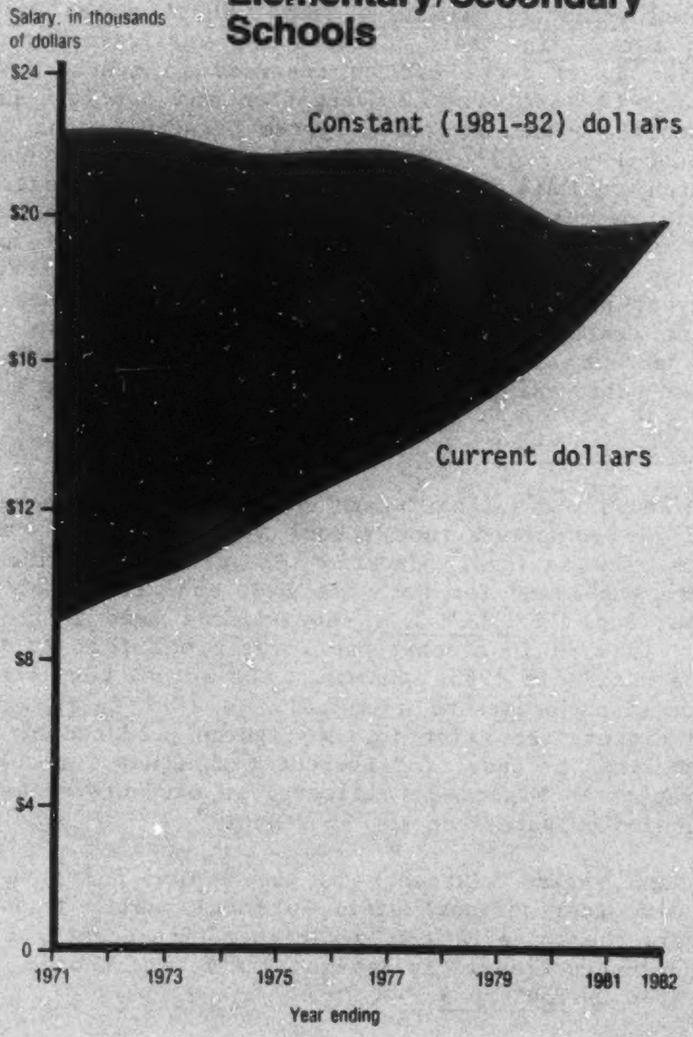
Figure 3.3 National Average Annual Salary of Classroom Teachers in Public Elementary/Secondary Schools



E. Student-Teacher Ratios

The student-teacher ratios for public and nonpublic schools for 1983-84 are presented in Table 3.7. Trends in student-teacher ratios for the period 1971-80 can be found in the 131st Annual Report of the Louisiana Department of Education. In 1982-83, there were 18.7 students and in 1983-84 there averaged slightly fewer than 19 students for every full-time classroom teacher in Louisiana public schools. Tables 4.4, 4.5, and 4.6 present mean class size by class type of data, which are a more relevant measure of the relationship between the numbers of teachers and students in the Louisiana school system.

In 1978 the Public Affairs Research Council published a bulletin entitled Impact of Declining School Enrollments: Past, Present, and Future. In this bulletin it was demonstrated that a decrease in students and an increase in teachers occurred in grades 1-12 (excluding kindergarten and special education) of the Louisiana public school system between school year 1969-70 and school year 1977-78. A similar analysis by the Bureau of Research on data from 1970-71 to 1979-80 demonstrated a 9.7 percent decrease in students and a 2.7 percent increase in teachers during this period. These trends resulted in a decrease in the pupil-teacher ratio during the 1970s. In the five-year period since 1979-80, however, there has been a 3.1 percent decrease in student enrollment and a similar decrease (4.3 percent) in the number of full-time teachers. Thus, a similar ratio existed in 1983-84 as did five years ago.

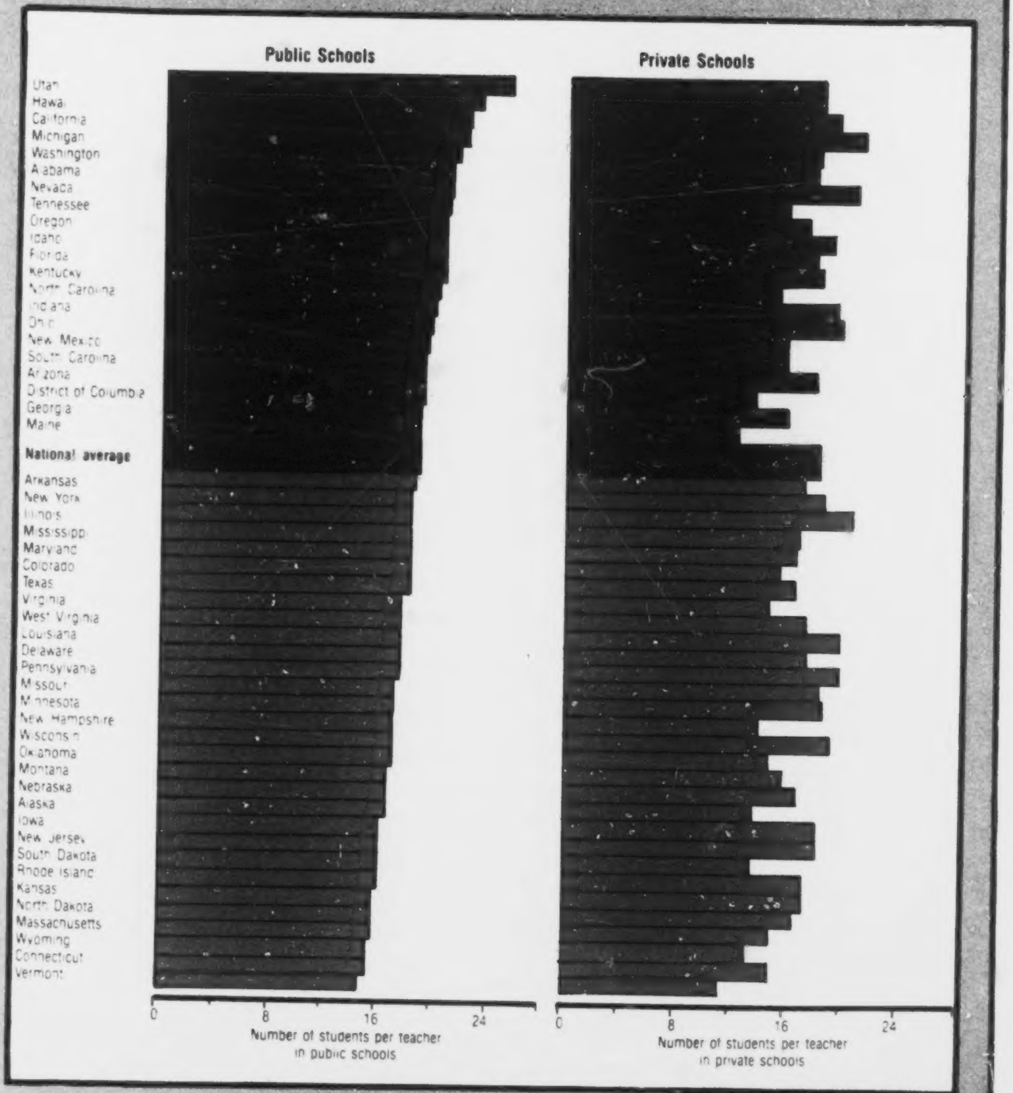
F. Louisiana and the Nation

The trend in Louisiana toward decreased pupil-teacher ratios in the 1970s continued into school year 1982-83 on the national level. The National Education Association provides data that compare the trend for both the U.S. and Louisiana. These data can be found in Table 3.8. Louisiana ranked thirteenth in the nation in 1972 in teacher-pupil ratio but fell to thirty-third in the nation in 1983. However, the actual pupil-teacher ratio in Louisiana decreased from 20.2 to 18.7 during that period. (Some differences exist in the figures produced by the NEA and PAR analyses because of different techniques for computation of the ratios.) Figure 3.4 illustrates student-teacher ratios in public and private schools, by state.[24]

Louisiana ranked sixteenth in the nation for total number of full-time instructional staff in local public schools in 1982. However, the state ranked even higher (fourteenth) in the number of noninstructional full-time staff in public schools as indicated in Table 3.9.

While the state has maintained a pupil-teacher ratio comparable with the national ratio, the estimated average salary of public school teachers has been consistently below the national average. In the 1982-83 school year, the difference narrowed somewhat; however, 1983-84 estimates again leave Louisiana with a relatively low (36th) ranking. According to

Figure 3.4 Student-Teacher Ratios in Public and Private Elementary/Secondary Schools



National Education Association estimates, Louisiana paid its public school teachers 81.4 percent of the national average in 1969-70, 82.1 percent of that average in 1974-75, and 86.7 percent of the national average in 1983-84.[25] The estimated average salary of public school teachers nationally was $22,029 in 1983-84, compared with the Louisiana average of $19,100, according to NEA.

It should be noted that data collected at the Louisiana Department of Education indicate that the average classroom teacher in the state made approximately $18,400 in 1983-84, or 83.5 percent of the estimated national average. This figure is more accurate than the NEA estimate of Louisiana teachers' salaries, since it is based on the direct financial reports from the parishes.

The state ranked last in percent of male teachers in public elementary and secondary schools. In 1983-84, NEA estimated that approximately 18 percent of the teachers in Louisiana were male, compared with the estimated national average of approximately 32 percent. (Actual statistics compiled by the Bureau of Research indicated 19.7 percent of Louisiana school teachers were male in 1983-84.)

[a] Experience of principals and teachers was reported by the districts in 1979-80 in the following categories: 0 years, 1-2 years, 3-5 years, 6-9 years, 10-12 years, 13-14 years and 15 or more years. This categorization is different from that reported for the years 1972-78. To obtain comparable data across the decade, an extrapolation was performed on the 1979-80 data. Category 0-4 years experience for 1979-80 includes categories 0, 1-2 years and 2/3 of the number reported for category 3-5 years. Category 5-9 years experience for 1979-80 includes 1/3 of the number reported for category 3-5 years, plus all those in category 6-9 years.

[b] This figure does not include 38 principals from Ouachita Parish for whom experience data were unavailable.

Chapter 4

4. ADDITIONAL EDUCATIONAL STATISTICS

- Number of Schools--The total number of public and nonpublic schools in Louisiana increased only a small margin (0.2 percent) from 1974 to 1984. There was a net increase of four schools during this same 10-year period, consisting of an increase of 38 schools in the public school system and a decrease of 34 schools in the nonpublic system. It should be noted that although only 420 nonpublic schools were reported (1983-84) via voluntary statistical reporting to the Bureau of Research, the Bureaus of Elementary and Secondary Education reported 478 nonpublic schools in Louisiana.[26] This figure (478) would change the estimate of the total number of schools in Louisiana to 1,966, only slightly different from the 1982-83 total of 1,960 schools or the 1981-82 total of 1,978 schools. The number of public schools dropped by 12 in 1983-84 from the previous year, according to Bureau of Research records. Again, the Bureaus of Elementary and Secondary Education reported a higher number, 1,515 public schools, which is closer to figures reported from 1980 through 1982. Figure 4.1 illustrates the percent change in public schools between 1971 and 1981 for each state, according to a national source.[27] Noting only a few exceptions, states that registered increases in the number of public schools during that decade were clustered in the southeast and southwest; decreases occurred in the northeast and north central regions. See Table 4.1 for more details on the number of Louisiana schools.

  As indicated in Table 4.2, there was a net decrease in the number of buildings and in the number of sites of public school property from 1974-84. Overall, the total cost of buildings, sites, and equipment more than doubled during this period, with the largest increases occurring during the inflationary 1976-81 period.

- Libraries--The number of libraries, librarians, and books all increased from 1974 to 1983 as noted in Table 3.3. Current payments for salaries, books, and supplies more than doubled during this period. These same current payments decreased somewhat, however, from the 1982-83 school year. Also, the reported number of full-time librarians decreased for the previous year and was the smallest figure reported since 1977-78.

- Average Class Size--The Bureau of Research collected data on class size by type of classroom for the first time in Louisiana during the 1980-81 school year. These data contain more valuable information than pupil-teacher ratios, which mask large differences in class sizes that exist between regular, special, and compensatory classes.

The distributions of class size by classroom type for elementary and secondary schools for school year 1983-84 are found in Tables 4.4 and 4.5 respectively. Table 4.6 presents mean class size by class type. As Tables 4.4 and 4.5 indicate, the highest percentage of regular classes was found in the medium class size range (20-24, 25-29). This applies to both elementary and secondary schools. Ungraded (continuous progress) classes in the elementary schools were also concentrated in this range.

Increased
Decreased, less than or equal to national average (−4.1 percent)
Decreased, more than national average (−4.1 percent)

Special education classes, on the other hand, were concentrated in the smaller class size range (5-9, 10-14). This also applies to both elementary and secondary schools. Compensatory education classes in elementary schools were also concentrated in the smaller class range. Vocational education classes were concentrated in small-to-medium ranges in class size (15-19, 20-24).

As Table 4.6 indicates, the mean class size for regular education classes in the elementary grades was 24.89 in 1983-84, while it was 22.66 in the regular secondary grades. Mean class sizes for special education classes for the elementary and secondary grade levels were 7.88 and 7.86 respectively.

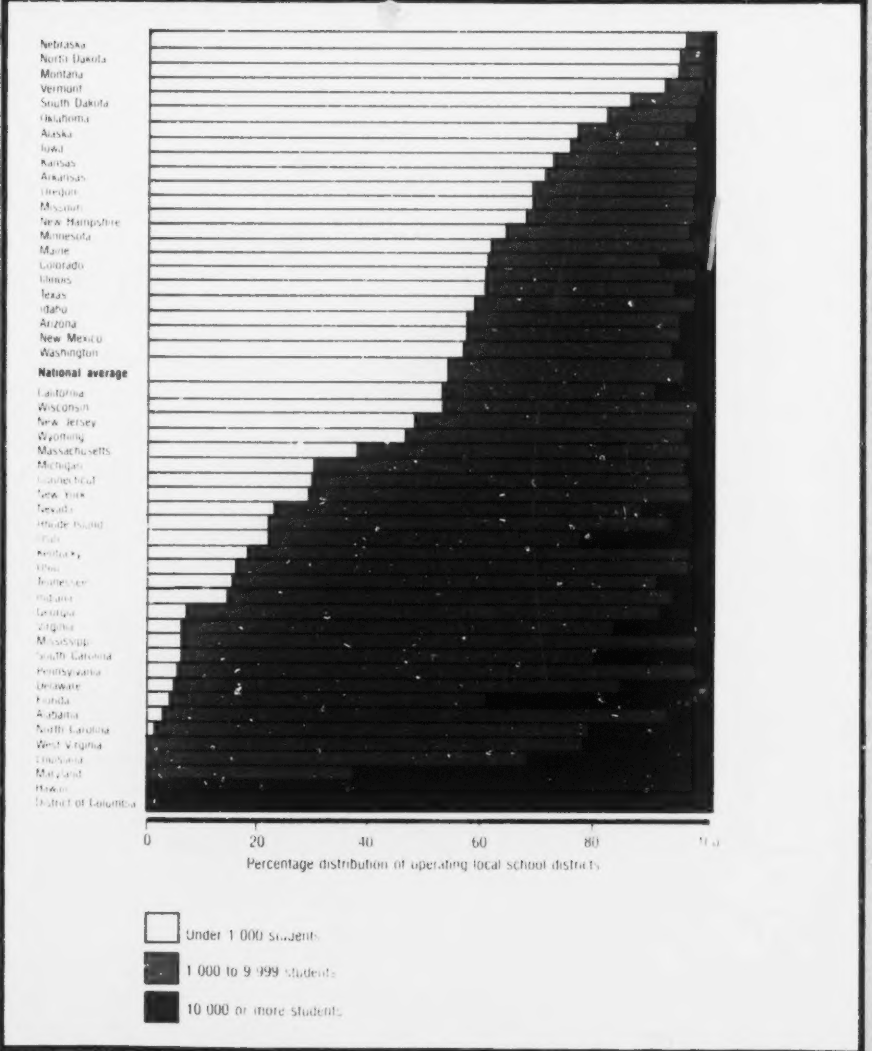
- Transportation--Approximately 620,000 public and nonpublic students have been transported to and from school during the 1983-84 session. In the 1983-84 school year the State of Louisiana operated 7,511 school buses at an annual cost of approximately $179 per student. These buses traveled approximately 500,000 miles. The cost for this transportation, on an annual basis, has risen steadily during the decade with the cost for the 1983-84 school year being more than $110 million. More information for school year 1983-84 can be obtained by examining Item 18 on the Louisiana State Profile.

- Number of Administrative Units--Louisiana has a relatively small number of basic administrative units operating public school districts: 66, one in each parish plus the cities of Monroe and Bogalusa. Only nine states in the nation had fewer operating units than Louisiana in 1982.[28] Compared with the rest of the nation, Louisiana's local school districts have a relatively high percentage of students per district as indicated in Figure 4.2.[29]

- Teacher Aides--For the first time, the Louisiana State Profile and district profiles contain information on the ratio of teacher/library aides to full-time teachers. In the 1983-84 school year the state ratio averaged 6.5 teachers to one aide. The ratios varied widely from district to district (see School District Profiles, Additional Educational Statistics) from a high of 21.9 teachers per aide to a low of 3.2 teachers per teacher/library aide.

- Computers in Education--In 1982-83 approximately 345 schools in Louisiana reported having one or more computers. Within these 345 schools a total of 1,392 computers for instruction were in use (see School District profiles, Additional Educational Statistics). According to a more recent report, 682 schools reported having computers in 1984 with a total of 4,350 computers for instruction in use (over three times that of 1982-83).[30] This report also noted that computers are being used at all grade levels and across 17 subject areas.

Figure 4.2 Enrollment Size Distribution of Operating Local School Districts



For the Nation as a whole and in 24 States, school districts of under 1,000 students represented the majority of districts in 1981-82.

---

[a] The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data, thus resulting in an undercount of nonpublic schools.

[b] These percent changes are from the previous year.

[c] Lafayette Parish failed to report data on nonpublic schools for 1979-80. Data from 1978-79 were substituted for the missing 1979-80 data in compilation of the total number of schools for 1979-80.

TABLE 4.2

INVENTORY OF PUBLIC SCHOOL PROPERTY, 1974-84

Session	Number of Buildings	Cost of Buildings	Number of Sites	Cost of Sites	Cost of Equipment	Total Cost of Buildings, Sites and Equipment	Percent Increase Over Previous Year

Chapter 5

5. FINANCE FOR EDUCATION

Finance for education in Louisiana is presented in this chapter in three sections: Local Reporting, State Government Spending, and Louisiana and the Nation--Comparative Statistics. This information reveals the changing financial conditions in recent years.

A. Local Financial Reporting by Parish/City School Systems

The unaudited data included in the following tables are presented as reported to the State Department of Education by the 66 parish/city school systems.

Table 5.1 presents revenue from local, state, and federal sources for the past five fiscal years. Total revenue for the 1984-85 year increased 4.44 percent over the prior year and 40.35 percent over the 1979-80 fiscal year. Figure 5.1 gives the percentages of revenue from local, state and federal sources for the 1983-84 fiscal year.

The total amount reported for ESEA and ECIA is presented in Tables 5.2 and 5.3. The Education Consolidation and Improvement Act of 1981 (ECIA) repealed the Elementary and Secondary Education Act (ESEA) effective October 1, 1982. While there has been a small increase in dollar amount received, the percent of total revenue has remained 3.69 as in the 1982-83 year.

Table 5.4 presents the expenditures the school systems have reported for Instruction, Community College Programs, Supporting Service Programs, Community Service Programs, Nonprogrammed Charges, and Debt Service. Figure 5.2 gives the percent spent on each function of education.

Expenditures per public school pupil for the past decade are found in Table 5.5. Comparing the 1983-84 fiscal year with the 1982-83 fiscal year indicates that expenditure per registered student increased by 1 percent, the increase in expenditure per average daily membership was negligible, and the expenditure per average daily attendance decreased by 1 percent. The nine-year trend (1974-75 to 1982-83) of decreasing registration, average daily membership, and average daily attendance with increasing expenditures was not continued in the 1983-84 fiscal year. Instead, there was an increase over prior years in registration, average daily membership, and average daily attendance, and there was no significant growth in expenditures.

Indebtedness for Louisiana's parish/city school systems decreased by 1 percent as indicated in Table 5.6; 97.4 percent of this debt is bonded debt. Cash and investments decreased overall by 1.1 percent. This decrease consisted of a decrease

Figure 5.1 Sources of Revenue for Louisiana Education, 1983-84

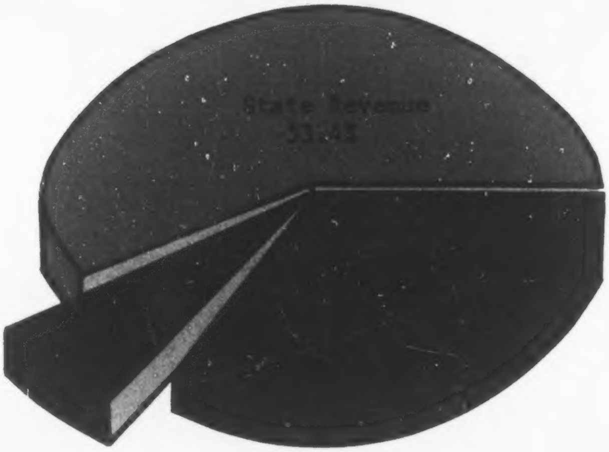

Figure 5.2 Expenditures for Louisiana Education, 1983-84

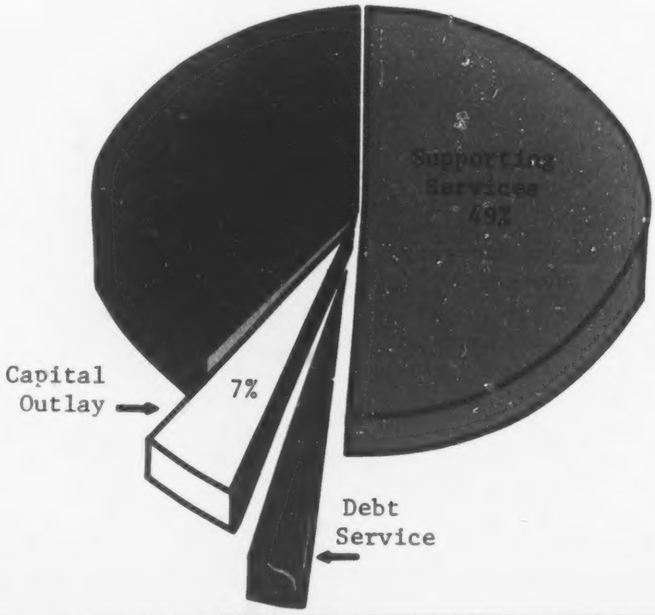


of 32.44 percent reported in cash and an increase of 5.61 percent in investments. Table 5.7 presents the ending figures for cash and investments.

Expenditures for the 1983-84 year increased 3.59 percent over the 1982-83 year while revenues increased 4.44 percent. Cash and investments decreased 1 percent as did bonded debt. These statistics indicate a leveling trend in finance for education for the past two years.

The 1983-84 year is the first time for inclusion of figures relating to student activity funds as shown in Table 5.8. In the past, reporting for these funds was not required; therefore, prior year data are not available.

B. State Spending on Education

The amount appropriated in the last 10 years for distribution in the Louisiana Public School Fund, Minimum Foundation Program Equalization, is presented in Table 5.9. The trend of an increase each year for the past decade has changed in the 1983-84 year to a decrease from the prior year in net distribution to local school systems. This decrease is caused by the 2.575425 reduction taken from the "Difference Necessary to Equalize." This is the largest reduction in the past 10 years.

Total expenditures for special education in Louisiana increased drastically in the past 10 years as shown in Table 5.10. State expenditures in the 1983-84 year have increased 2.83 percent over those of the prior year and over the past 10 years have increased approximately five-fold. Federal expenditures, while increasing in 1983-84 by 18.22 percent, were still not at the 1981-82 funding level. Overall expenditures for special education increased 4.58 percent in 1983-84 from the prior year and were more than five times the amount spent in the 1974-75 year. While both of the 10-year comparisons are not indexed for inflation, the figures do represent a significant growth.

Expenditures for vocational education have remained steady over the past two years as denoted in Table 5.11, which presents expenditures for the past decade. The current expenditures, however, do show a 79.47 percent increase over the 1974-75 expenditures.

The Department of Education's total budgets and expenditures for the year ending June 30, 1984, are revealed in Table 5.12, by Agency, as listed in the Appropriations Bill.

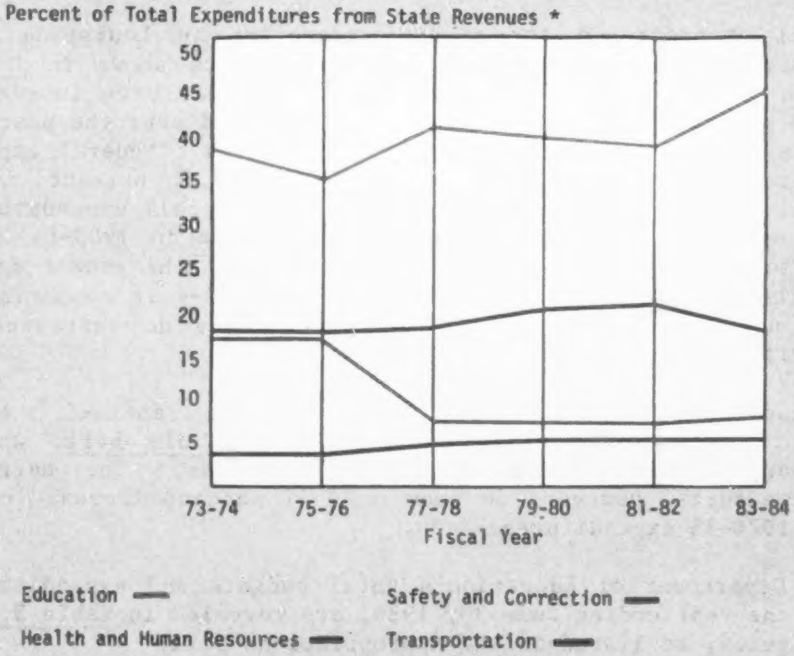
Table 5.13 exhibits the expenditures of all state revenues excluding federal grants by major departments. Education takes the largest percentage of revenues, 44.28 percent, with the Department of Health and Human Resources next largest at 19.12 percent. Figure 5.3 gives these functional expenditures as a percent of the total expenditures.

Table 5.14 exhibits the expenditure of all state revenues including federal grants by major departments.

C. Louisiana and the Nation--Comparative Statistics

Comparisons of general financial resources and governmental revenue of Louisiana with the National Average are given in Table 5.15. Louisiana has shown some improvement in the 1982 ranks as compared with 1981. Louisiana's per capita personal

Figure 5.3 Expenditures for Selected Functions of State Government, Louisiana, 1983-84



* Percentages from 78-79 through 83-84 are based on budgeted figures, not actual expenditures

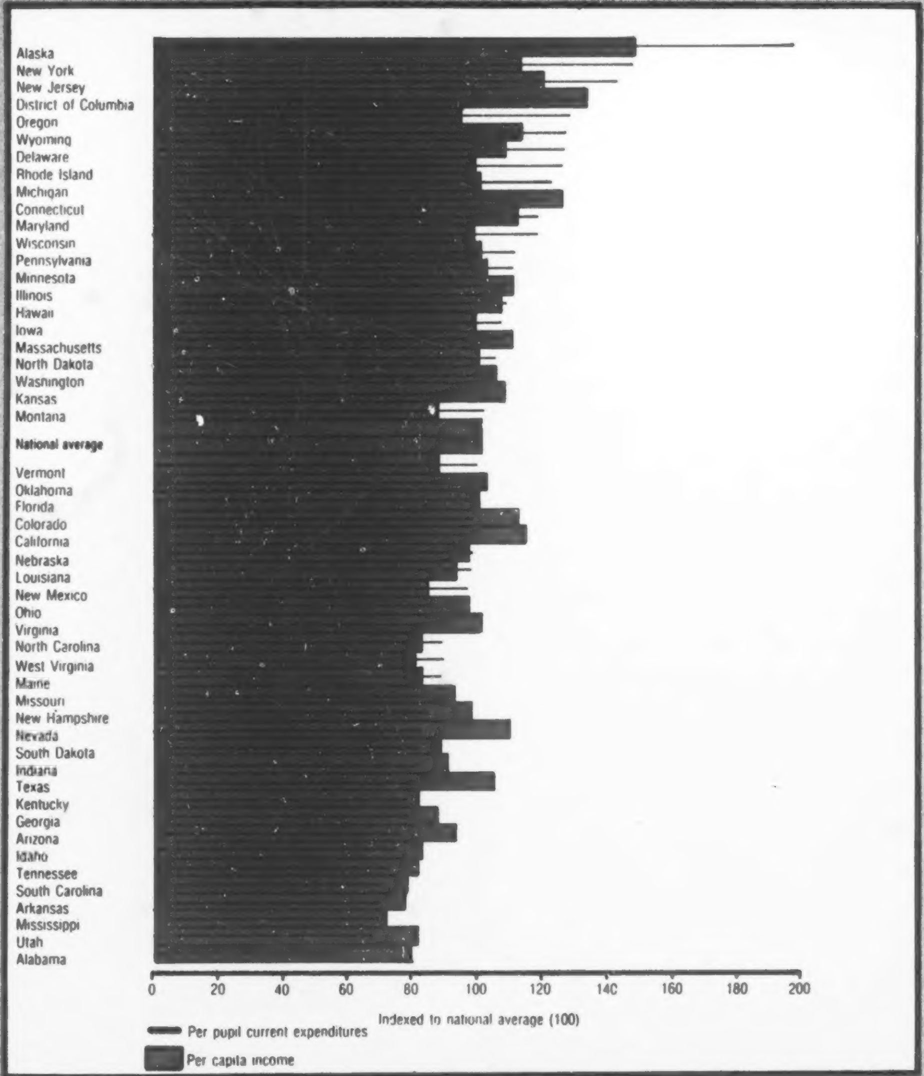
income for 1982 is ranked thirty-second as opposed to thirty-fifth in 1981, and per capita personal income as a percent of the national average was 93.17 percent in 1982 as opposed to 90.73 percent in 1981. In school year 1981-82 the amount Louisiana spent per capita on education was approximately 2.5 percent greater than the national amount spent. Thus, Louisiana's above average ranking, twenty-fourth in amount spent per capita on education, is a function of its high percentage of commitment of personal income to education, in direct contrast with Louisiana's low per capita income. Figure 5.4 shows per pupil expenditures and per capita income indexed to the National Average, by state, for 1981-82.[31] Per capita disposable personal income has improved as well, increasing from $8,116 in 1981 to $8,735 in 1982. In 1979 Louisiana ranked forty-sixth in personal income per child of school age, whereas in 1982, that rank improved to thirty-seventh with a personal income per school aged child of $47,081.

While Louisiana's per capita personal income is well below the national average, the state is higher than the average in per capita total general revenue of state and local governments and ranks twentieth in the nation. This relatively high tax burden is not a function of property taxes, as Louisiana has the second lowest per capita property tax revenue in the nation.

In a supplement to its basic volume, Tax Wealth in Fifty States, 1977, the National Institute of Education (NIE) presented tax capacity and effort, and collected revenue data for state and local governments.[32] This supplement concluded that Louisiana under-utilized property taxes and slightly over-utilized sales and gross receipt taxes. While the state ranks relatively high in revenue of state and local governments as percent of personal income according to the NEA rankings, the NIE report concludes that the state is taxing well below its capacity relative to other states. In fact, according to the report, Louisiana had one of the largest negative values in the nation for amount collected less potential tax yield. (Major taxes being under-utilized are property taxes on commercial and industrial firms, public utilities, and residences.) This situation of taxing below capacity may not exist to such a degree today as several new taxes were levied during the 1984 Legislative Session.

The National Education Association estimated that Louisiana ranked thirty-eighth in the nation in public school revenue receipts per pupil in average daily attendance in 1983-84. Compared with national figures, Louisiana receives relatively less of its revenue for public education from local sources and relatively more from state and federal sources. Table 5.16 presents the NEA estimates for Louisiana and the nation, in percent of public education revenue from federal sources in

Figure 5.4 Per Pupil Expenditures and Per Capita Income Indexed to National Average: 1981-82

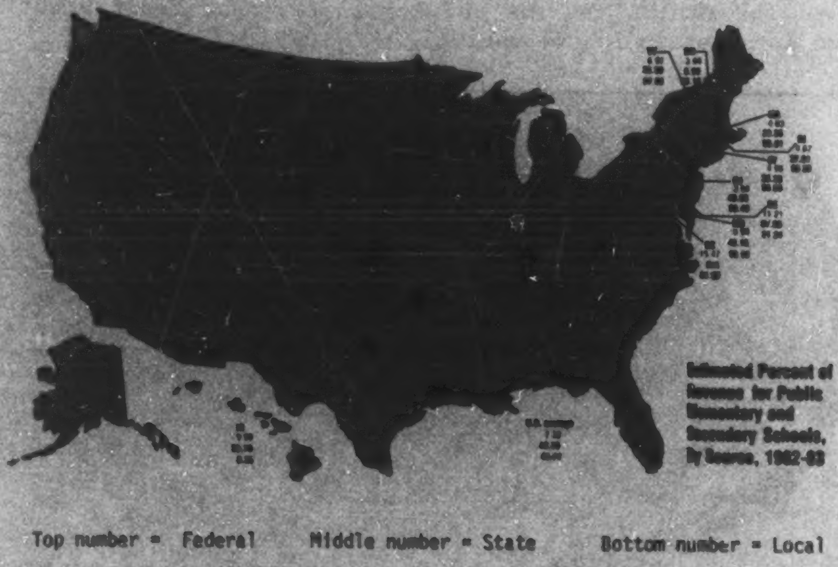


When indexed to the 1981-82 national average, many States with incomes 10 percent or more below average had an even lower index of per pupil expenditures. The majority of States with incomes 10 percent or more above average had an index of per pupil expenditures that exceeded their per capita income index number.

1983-84. Louisiana ranked fifteenth in this category, whereas the state ranked third in this category in 1981-82. Figure 5.5 shows sources of funding for public schools, by state for 1982-83[33].

Table 5.17 presents a comparison of Louisiana and national direct expenditures for all governmental functions and for education for years 1974 through 1982. For each of these nine years, the percent of per capita income that Louisiana spent on all governmental functions was above the national average, ranging from an excess of 1.1 percent to 2.8 percent.

Figure 5.5 Where Public Schools Get Their Operating Funds



Estimated Percent of Revenue for Public Elementary and Secondary Schools, By Source, 1982-83
Top number = Federal
Middle number = State
Bottom number = Local

Comparisons of state and national expenditures per pupil in average daily attendance and membership are found in Table 5.18. Louisiana spent approximately 93.9 percent of the national average expenditure for public schools per pupil in average daily attendance in 1982-83 but NEA estimates 88.3 percent for 1983-84. A similar range exists for average daily membership. Although these expenditures are below the national averages, the state did spend a higher percentage (4.16 percent) of its citizens' personal income on education in 1981 compared with the national average (3.97 percent). Thus, again, the state's low rank on school expenditures is an indication of low personal income rather than low commitment to education.

The National Center for Educational Statistics publishes a comparison of the distribution of school districts by current expenditure per pupil. No school district in Louisiana spent more than $1,999 per pupil in the school year ending 1980; nationally 18.1 percent of the school districts spent more than $2,000 per pupil in this school year as shown in Table 5.19. A more recent publication by NEA Research presented the average per pupil expenditure by state as shown in Figure 5.6.[34]

A comparison of the purposes for which Louisiana and the nation expended education funds in 1980-81 is found in Table 5.20. Louisiana spent less than the national percent for current expenditures for elementary and secondary schools and more for Other Programs and Pupil Services, Capital Outlay, and Interest on School Debt.

[a] Plaquemines Parish failed to report financial data for 1979-80. Data from 1978-79 were substituted for the missing 1979-80 data in the compilation of the totals for 1979-80.

[b] Beginning with school year 1980-81 revenue figures do not include Federal Indirect Cost as in prior periods.

[c] Union Parish failed to report financial data for 1982-83. Data from 1981-82 were substituted for the missing 1982-83 data in the compilation of the totals for 1982-83.

TABLE 5.2

REVENUE FROM ESEA TITLE I FUNDS, 1973-83[a]

Year	ESEA Title I	ESEA Title I Migrant	Total ESEA Title I	Percent of Total Revenue from All ESEA Title I
1973-74	$31,875,628	$ 428,337	$32,303,965	3.11
1974-75	39,238,405	332,208	39,570,613	4.17
1975-76	55,695,485	499,852	56,195,337	5.33
1976-77	53,518,583	448,265	53,966,848	4.87
1977-78	65,732,999	610,473	66,343,472	5.27
1978-79	66,474,878	2,800,603	69,275,481	5.09
1979-80[b]	80,425,044	2,299,409	82,724,453	5.23
1980-81	86,084,095	3,320,985	89,405,080	4.93
1981-82	75,738,391	3,556,720	79,295,111	3.83
1982-83[c]	8,909,423	2,977,895	11,887,318	.56

[a] ESEA was repealed effective October 1, 1982 and was replaced by ECIA.

[b] Plaquemines Parish failed to report financial data for 1979-80. Data from 1978-79 were substituted for the missing 1979-80 data in the compilation of the totals for 1979-80.

[c] Union Parish failed to report financial data for 1982-83. Data from 1981-82 were substituted for the missing data in the compilation of the totals for 1982-83.

TABLE 5.3

REVENUE FROM ECIA FUNDS, 1982-84

Year	ECIA Chapter 1	ECIA Chapter 2	Total ECIA	Percent of Total Revenue for All ECIA
1982-83[a]	$61,489,303	$5,032,814	$66,522,117	3.13
1983-84	72,664,570	9,093,312	81,757,882	3.69

[a] Union Parish failed to report financial data for 1982-83, therefore this total does not include their data.

TABLE 5.4

---

[a] Net expenditures for 1974-80 included all expenditures except capital outlay; net expenditures for 1980-84 included only instruction and supporting services.

[b] This figure includes students in special education and kindergarten.

[c] Plaquemines Parish failed to report financial data for 1979-80. Data from 1978-79 were substituted for the missing 1979-80 data in the compilation of the totals for 1979-80.

[d] Union Parish failed to report financial data for 1982-83. Data from 1981-82 were substituted for the missing 1982-83 data in the compilation of the totals for 1982-83.

TABLE 5.6

STATE TOTALS FOR BONDED AND OTHER DEBT FOR LOUISIANA SCHOOL SYSTEMS, 1980-84[a]

	1980-81[b]	1981-82	1982-83[c]	1983-84
Beginning Balance Bonded	$706,087,753	$771,105,847	$795,925,000	$896,098,000
Bonds Sold	99,692,300	68,432,700	160,590,000	27,765,000
Bonds Redeemed	42,106,361	44,759,000	60,657,000	50,587,500
Ending Balance Bonded	763,673,692	794,779,547	895,858,000	873,275,500
Short-Term Debt	35,071,699	2,713,231	2,544,265	9,564,646
Long-Term Debt	7,869,672	7,863,173	7,013,899	13,694,149
Total Indebtedness	$806,615,063	$805,355,951	$905,416,164	$896,534,295

[a] Figures above were compiled from unaudited data furnished directly to the Louisiana State Department of Education from the parish/city school systems, which may include later audit changes to the beginning balance.

[b] The short-term debt figure for this year includes payables, subsequent years do not.

[c] Union Parish did not report this data; an estimate based on 1981-82 data was substituted in the compilation of state totals.

TABLE 5.7

CASH AND SECURITY HOLDINGS AT END OF FISCAL YEAR AND PRIOR YEAR COMPARISON

	June 30, 1983[a]	June 30, 1984	Percent Increase (+) or Decrease (-)
Cash	$111,866,472	$ 75,574,173	-32.44
Investments	527,544,651	557,137,228	+ 5.61
Total	$639,411,123	632,711,401	- 1.05

[a] Union Parish did not report financial data for 1982-83; data from 1981-82 was substituted in the compilation of state totals.

TABLE 5.8

STUDENT ACTIVITY FUNDS

	1983-84[a]
Beginning Balance Cash and Investments	$ 19,835,630
Receipts	93,400,770
Amount Available for Student Activities	113,236,400
Disbursements	93,552,230
Ending Balance Cash and Investments	$ 19,684,170

[a] These figures are based on the 53 parish/city school systems reporting this data.

TABLE 5.19

LOUISIANA AND NATIONAL PERCENTAGE DISTRIBUTION OF SCHOOL DISTRICTS, BY CORE[a] CURRENT EXPENDITURE PER PUPIL: SCHOOL YEAR ENDING 1980[b]

	Under $1,000	$1000 to $1199	$1200 to $1399	$1400 to $1599	$1600 to $1799	$1800 to $1999	$2000 to $2299	$2300 to $2599	$2600 $2899	$2900 and over	Weighted Mean[c] Expenditure
U.S.	3.0	10.0	16.8	17.6	16.5	13.3	10.4	5.0	2.7	4.7	$1667
Louisiana	1.5	12.1	42.4	30.3	6.1	6.1	1.5	0	0	0	$1365

[a] Core is calculated by subtracting food services and transportation costs from total current expenditures.

[b] These percentages were taken from the The Condition of Education: 1983 Edition, National Center for Education Statistics.

[c] Total core current expenditures divided by total enrollment.

TABLE 5.20

SUMMARY OF LOUISIANA AND NATIONAL EXPENDITURE BY PURPOSE FOR PUBLIC ELEMENTARY AND SECONDARY EDUCATION AS PERCENTAGE OF TOTAL EXPENDITURE, 1980-81[a]

	Total Expenditures All Schools	Current Expenditures[b] for Elementary and Secondary Schools	Other Programs and Pupil Services[c]	Capital Outlay[d]	Interest on School Debt
U.S. Percent	100%	90.9	.7	6.6	1.8
Louisiana Percent	100%	87.9	1.5	8.3	2.4
Louisiana Percent Minus U.S.Percent	--	-3.0	+.8	+1.7	+.6

---

[a] Source: Percentages were calculated by the Bureau of Research, Louisiana Department of Education from figures found in the National Center for Education Statistics publication entitled Digest of Education Statistics, 1983-84.

[b] Includes expenditure at all levels: state departments and state boards of education, and local education agencies.

[c] Includes food services, pupil activities paid from tax revenues, summer schools, community services, and private schools.

[d] Includes capital outlays by state and local school housing authorities.

Chapter 6

6. LOUISIANA AND THE SOUTHEAST REGION

The Southeastern Regional Council for Educational Improvement (SRCEI) is a nonprofit, interstate organization created and governed by the Chief State School Officers of 12 southeastern states. Louisiana is a member of SRCEI, as is Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia. The SRCEI is instrumental in assisting member states and their State Departments of Education in studies of educational policies, including teacher and school effectiveness, school leadership, educational technology, teacher work force, and educational finance. In addition, SRCEI provides the southeastern state policy makers with a comprehensive data base on enrollment, personnel, and finance for public elementary and secondary schools. The purpose of this chapter is to provide an overview of Louisiana's place in relationship to other member states on a number of pertinent issues concerning student and staff profiles and educational finance.[35]

A. Student Profiles

The median age among the U.S. population is higher due to lower birthrates and longer life spans. One of the effects of this trend is declining enrollment in elementary and secondary

school of all types, both nationally and in the southeastern region. While the southeast has experienced a gradual decline in enrollment, its enrollment rates have not decreased as rapidly as other areas of the country. This is possibly due to migration patterns in the region which offset lower birthrates.

Within the southeast region, most of the individual states reported declines in enrollment. During the period from 1970 to 1982, there was a decline of 5-10 percent in enrollment in most states with the exception of Mississippi which had a 12 percent decline and Florida which showed a slight increase in total enrollments. During that same period, Louisiana experienced an 8 percent decline in total enrollment in public schools.

Private school enrollment has also declined at a steady rate since 1965 both in total numbers and as a percent of total school enrollment. National figures indicate that there were 6,800,000 students enrolled in private schools in 1965 representing 13.89 percent of total school enrollment. By 1980

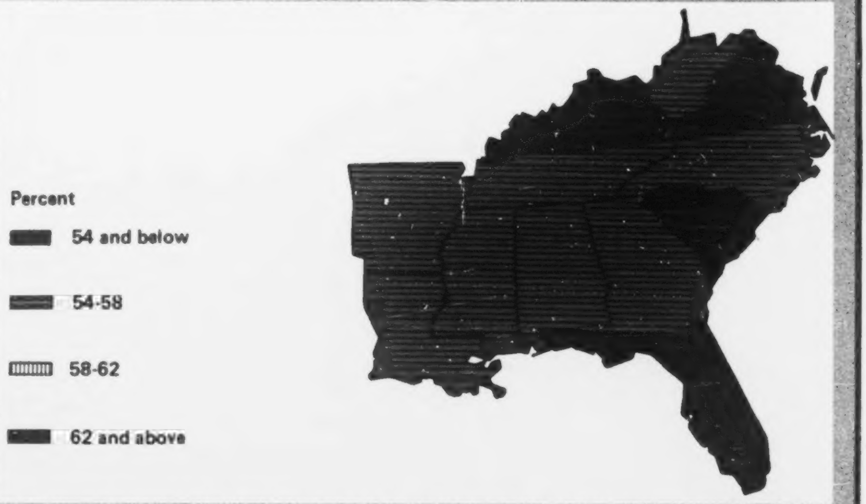
WEST VIRGINIA..	4.35	3.15	2.65	2.05

that number had decreased to 3,923,000 or 8.74 percent of total school enrollment.

In the southeast the number of students enrolled in private schools decreased between 1965 and 1970, increased between 1970 and 1975, and is now showing a decline. Within the member states only Tennessee showed a slight increase in private school enrollment. All the other member states reported declines in enrollment between 1965 and 1980. Particularly dramatic declines were reported by Louisiana (from 16.67 percent to 13.36 percent) and Kentucky (from 13.16 percent to 7.97 percent).

The number of high school graduates on a national level peaked during the 1975-1976 school year. Since then, there has been a slight decrease in graduates, reported at 3 percent. In the southeast there has been a relatively stable number of graduates in the last 17 years, in contrast to other areas of the nation which have either decreased or increased the number graduated. While overall the southeastern states are stable, there are several notable exceptions. Florida increased the number of graduates by 43 percent in the last 17 years. In Georgia, Kentucky, and Virginia the number rose by 22 percent. Louisiana has experienced a 15 percent increase in the number of graduates from 1965 to 1982.

Figure 6.3 Percent of Population Over 25, Who Have Completed At Least 4 Years of High School, 1980



A significant achievement is that the percent of population over the age of 25 who have completed at least four years of high school has risen steadily. This trend is demonstrated both nationally and regionally. Even though these figures have risen for the southeast, it must be noted that the southeast is significantly below other regions of the U.S. in percentages of graduates over age 25. Nevertheless, the southeast has increased its number of high school graduates from 15-16 percent in 1940 to 52-67 percent in 1980. Louisiana increased its percentage rate from 17.50 percent in 1940 to 58 percent in 1980, thus demonstrating characteristics typical of the southeastern states.

B. Staff Profiles

During the last 15 years, the southeast has experienced continued growth in the number of employees in elementary and secondary education. Despite this growth pattern, the southeast remains lower than other areas of the U.S. in absolute numbers employed.

Current trends indicate that the proportion of total staff employed as classroom teachers has been declining gradually. This has occurred both nationally and in the southeast region. However, the decline in the southeast has been at a slower rate, thus yielding proportions of classroom teachers to total staff which are now similar to those of other areas of the country. In 1980, national figures indicated that 52.12 percent of the total educational work force was composed of classroom teachers. During the same year, classroom teachers made up 51.74 percent of total staff in the southeast region. Since 1980 these figures have increased in the southeast, which now reports 53.80 percent of total educational staff as classroom teachers. Louisiana has experienced a 10 percent decrease in the percentage of classroom teachers of total staff from 1965 to 1982.

While the number of classroom teachers has declined, the student/teacher ratio has also declined. The fewer numbers of teachers are offset by decreased enrollment rates. In 1965

the national student/teacher ratio was 24.56 students per teacher. In 1982 this had decreased to 18.51 students per teacher. In 1965, the southeast had the highest ratio in the nation--26.53 students per teacher, nearly two points above the national average. By 1982 a different pattern emerged. Because the rate of decline in the southeast was faster than that of other areas, the student/teacher ratio was 18.78 compared with the U.S. average of 18.51. In 1982, Louisiana had a student/teacher ratio of 18.25 students per teacher compared with a 25.57 ratio in 1965. It is noted that these figures do not reflect Average Daily Attendance as many student/teacher ratios do. While it is important to emphasize that these ratios do not reflect class size, they are designed to give a picture of the average number of pupils for which each teacher is responsible.

C. Education Finance

The southeastern states have made a concerted effort during the past 17 years to catch up with the finance records of other regions. By all measures--dollars spent, dollars per capita, dollars per pupil, and dollars per staff member--expenditures have remained below those of other regions. But the increases that the southeast has made during the last 17 years are more rapid than those of other areas. Total educational expenditures for the nation in 1981-82 were $109.1 billion with the southeast spending $21.28 billion. While the southeast spent less for educational expenditures than other regions, its rate of growth was 22 percent. This is significantly more rapid than growth in the other regions of the country, which had an annual rate of growth of 17 percent.
In actual dollars spent, the national average expenditure per student enrolled in the public school was $2,712.28 in 1981-82. The southeast has the lowest expenditure level in the country--$2,209.55 per student. This represents $502.73 below the national average. Florida, which also has the region's largest enrollments, had the highest expenditure level--$2,782.42 per student. It was also the only southeastern state with per pupil expenditures at or above the national average. Louisiana spent $2,563.85 per student, which exceeded the average expenditure spent by the southeastern region. The lowest expenditures per pupil were in Alabama ($1,531.40) and Mississippi ($1,689.17).

There were dramatic changes in growth rates in per pupil expenditures over the period from 1965 to 1982. The national average expenditures per student increased more than four-fold in that period. The average expenditures in the southeast jumped almost 400 percent. The problem with these data is that these growth rates do not take into account inflation. Once inflation is taken into account, the national growth rate is a modest 66 percent.

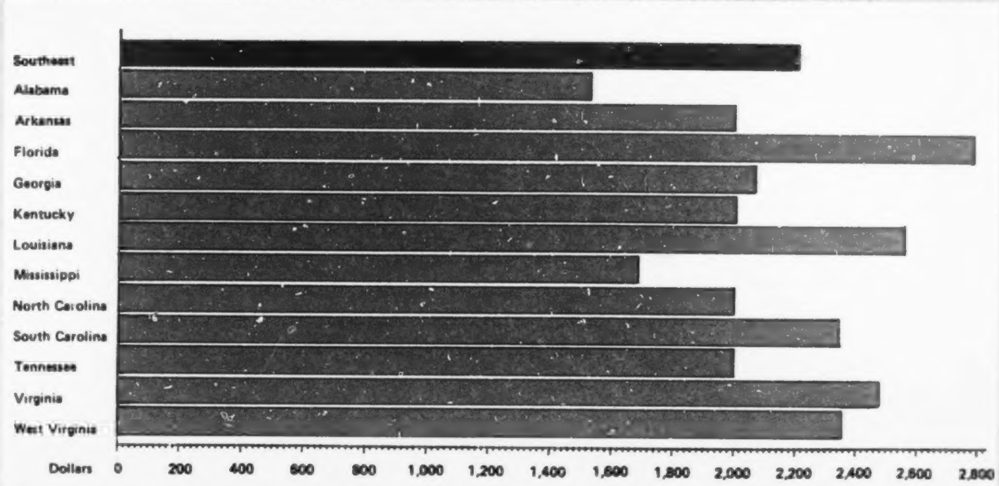

Figure 6.7 Expenditures Per Student in Actual Dollars, 1981-82

The national average teacher's salary in 1981-82 was $19,152. The southeast regional average salary ($16,545) is nearly $3,000 less than the national figure. Half of the states that pay below an annual salary of $16,000 are located in the southeast. Louisiana pays the highest average annual salary to its teachers. As of 1982 the average annual salary was $19,265.

While average salaries have more than tripled between 1965-1982, these figures are deceptive in that they do not take into account the annual inflation rate. Therefore, if one considers the national average salaries for teachers in real (1967) dollars, it becomes apparent that the national average has actually declined sharply since 1970. Although real salaries in the southeastern region also declined since 1971, the drop was less prominent than in other parts of the country, with the result that the gap between the southeastern states and the national average is now less in real dollars. It is noted that the annual average salary for teachers in Louisiana in real dollars (1967) is $7,072.00 compared with the national average of $7,031.00.

Chapter 7

7. CURRENT CHANGES AND ISSUES IN PUBLIC EDUCATION

A. Actions of the 1984 Louisiana Legislature

The 1984 regular session of the Louisiana Legislature began April 16 and ended July 5, 1984. This session saw a noticeable increase in the number of bills introduced. The 1983 session introduced 2,043 bills, passing 760, whereas the recent session introduced 3,025 and passed 963. Altogether, more than 300 education-related bills and resolutions were introduced, approximately 10 percent of all legislation. Approximately one-third have been voted into law.

The 1984 session was a battle of financing. The major goal for the Department of Education appeared to be maintaining as well as changing some existing programs and services. Although financial problems at the state level were paramount this session, several major pieces of education legislation were passed. They are as follows:

1. Senate Bill 921, Act 886 relative to competency-based education provides for the testing of students for compensatory education purposes in grades 2 through 5 beginning in the 1984-85 school year, with students in grade 8 to be tested beginning with the 1986-87 school year.

2. House Bill 1405, Act 283 incorporated Free Enterprise and Civics into one-half year courses of one semester each to equal one-half unit of credit for each.

3. House Bill 1406, Act 834 and Senate Bill 706, Act 758 established the Administrative Leadership Academy Commission within the Department of Education.

4. Senate Bill 704, Act 757 sets up the Louisiana Teaching Intership Program. This act states that beginning with the 1985-86 school year all teachers shall participate in this program for no less than the first full year of employment as a teacher.

5. Senate Bill 986, Act 148 provides for the Professional Development Centers. The act states that a maximum of eight Professional Service Centers will be created to deliver services for each area. The legislation further provides for boards of directors for each center and for rules and regulations by the State Board of Elementary and Secondary Education.

6. Senate Bill 707, Act 759 provides for the Career Ladder Commission. The purpose of this legislation is to research and develop a specific and complete career ladder plan for the teachers in the public elementary and secondary schools in this state. The act further states that the commission shall submit the plan required, in writing,

to the Governor, the State Superintendent of Education, the Senate Committee on Education, and the House Committee on Education no later than January 15, 1985.

7. Senate Bill 710, Act 290 relates to the Teacher Certification Examination. This legislation requires that any new examination or any change in the criteria established for the cut-off score for the present examination shall be approved by the State Board of Elementary and Secondary Education.

8. Senate Bill 709, Act 760 provides for mandatory establishment of kindergarten. The bill states that beginning with the 1985-86 school year, each city and parish school system shall provide for and offer in every school having a first grade or in a parish kindergarten center at least one-half day of kindergarten instruction to each child who becomes five years of age by December 31 of the school year.

9. Senate Bill 695, Act 318 and House Bill 1421, Act 836 provide that students entering a college of education shall satisfactorily pass an aptitude examination prior to such entry. The legislation also provides for exceptions. The bill further states that the deans of the colleges of education across the state shall set the cut-off score for such examination. The legislation takes effect with the Fall Semester 1985.

10. Senate Bill 697, Act 619 provides for the selection of 10 pilot projects in early childhood development from among proposals submitted by the city and parish school systems of this state. It states that the Louisiana Department of Education shall consider and evaluate each proposal and recommend to the State Board of Elementary and Secondary Education for approval the 10 projects, from those submitted, which meet the requirements of the act and which have the highest potential for improving the readiness of young learners in this state should the projects be implemented on a statewide basis or in the area in the state in which the specific needs exist.

11. House Bill 1418, Act 285 provides law relative to pilot projects in writing courses. The legislation states that prior to the beginning of the 1984-85 school year, the Louisiana Department of Education shall invite each public school in the state with grades 7, 8, 9, 10, 11, or 12 to submit to the department a proposal for a pilot project in writing, for students in these grades. It further states that the department shall consider and evaluate each eligible proposal pursuant to the act, and recommend those for approval by the State Board of Elementary and Secondary Education.

12. House Bill 1410, Act 835 provides law relative to the manner in which sabbatical leave for teachers may be spent. The bill provides that the teacher must pursue a program of study earning at least 12 undergraduate credit hours or nine graduate hours in order to maintain sabbatical leave during each semester of leave. The bill also provides for exceptions when teachers are unable to obtain sufficient graduate or undergraduate course work.

13. House Bill 1417, Act 699 provides for qualifications of teacher aides. The act defines teacher aides and further provides for their qualifications. The qualifications are as follows: a person must be 21 years of age, possess a high school diploma or its equivalent, have taken a nationally validated achievement test and scored so as to demonstrate a level of achievement equivalent to the normal achievement level of a tenth grade student. The act becomes effective at the beginning of the 1985-86 school year. The act also makes exceptions for parishes with tenure for teacher aides and exceptions which allow superintendents to exempt those teacher aides employed prior to the existence of this act.

14. House Bill 1357, Act 695 provides for the Quality Schools Cash Grant Concept. The act states that there shall be paid to each public or state approved private high school for its use not more than one cash grant of $300 for each student attending that school who makes a score of three or higher on the advanced placement college board examination. The act designates the grant as the Quality School Grant. The act further states that the Superintendent of Education shall be responsible for administering and distributing such funds and shall develop guidelines for the use of such monies by participating schools. These guidelines shall require that the money be used to support academic programs or activities, or to otherwise promote further academic excellence in the recipient school. The grants shall be paid from funds appropriated to the State Department of Education for this purpose.

15. House Bill 1414, Act 198 is relative to the Professional Improvement Programs and provides for a minimum number of minutes and days that a college course shall meet and be conducted in order to be an acceptable academic activity for the program. Also Senate Bill 694, Act 257 limits the Professional Improvement Programs to one five-year program.

B. Actions of the Board of Elementary and Secondary Education

During 1984 the members of the State Board of Elementary and Secondary Education issued several new standards and policies on various aspects of public education.[36] Some of the major Board actions included the following:

1. Beginning with school year 1985-86 for incoming freshmen, a student will have to complete a minimum of 23 Carnegie units of credit to meet high school graduation requirements. The 23 units required for graduation include 15½ required units (English--4, Mathematics--3, Science--3, Social Studies--3, Health and Physical Education--2, Computer Literacy--½) and 7½ elective units.

2. Effective in 1986-87 and thereafter, eleventh grade students will be required to pass the 11th Grade Basic Skills/Functional Literacy Test. The test is required at the end of the eleventh grade, and if failed, may be taken at the beginning of the twelfth grade. A student must pass this test in order to graduate.

3. An articulated elementary foreign language program (30 minutes per day) will be required in grades 4 through 6 for academically able students and will be optional for all others. Implementation of this foreign language program will begin with grade 4 in school year 1985-86 and extend upward at least one grade each year. The Board has also required academically able students in grades 7 and 8 to take an elementary foreign language program for 150 minutes per week. Implementation of this requirement will begin with seventh graders in 1987-88, and eighth graders will be added in 1988-89.

C. Current Issues

In September 1984, the 16th Annual Gallup Poll of the public's attitudes toward public schools brought to light many current issues which concern citizens of this nation.[37] The poll included, but was not limited to, issues such as curricular requirements, national tests for graduation, length of school day, spending for education, and teacher accountability. Opinion polls as such, along with national and local press, professional journals, and governmental and legislative efforts, contribute to describing the important issues in education today. A review of these sources reveals issues which appear to run concurrently among them:

1. Funding for Education: Budget deficits, inflation, and higher taxes of recent years have produced some austere measures in governmental financing, on the local as well as national level. Funding for education, in light of these measures, continues to be of major concern for educators, public officials, and taxpayers.

2. Student Accountability: Minimum competency/basic skills, assessment, and literacy testing of public school students continues to be an area of concern involving much effort and money. Curricular requirements, at both the elementary and secondary levels, graduation requirements, and college entrance requirements are also areas of recent change and

controversy; reforms in these areas appear to be originating from many areas, ranging from local school systems to legislative bodies.

3. Teacher Pay and Accountability: In educational, political, and public groups, debate rages over issues surrounding higher teacher salaries, career ladders, merit pay, quality of instruction, certification and tenure requirements, and education degree requirements. These matters appear to be of major importance in Louisiana as evidenced by recently introduced legislation.

4. Early Childhood Education: Emphasis on mandatory kindergarten and availability of preschool education is supported by much research which tends to indicate that children benefit from early childhood education. These types of programs, however, are restricted by funding and staffing problems and thus continue to be areas of debate.

5. Teacher Aides: With more emphasis on individualized instruction in the classroom, teacher assistance has become an issue of vital importance. Recent changes appear to involve providing stricter employment requirements for aides and tutors and increasing their availability in the classroom.

GENERAL EXPLANATION

This is the sixth year of the Annual Report in which data, gathered from each of the parish/city districts, are in one place rather than being spread throughout the report. This format aids readers interested in detailed information on a particular school district. A Louisiana State summary profile follows the individual district profiles and includes aggregate data for the State. The state profile supplements the data found in the state summary tables.

Please note that the entry NA appears throughout the profiles. This entry means data were not available for that district on that piece of information.

Also, please note that percentages for several items (Item 8, for example) are computer generated. Because of rounding, the sum of the percentages for some of these items may equal 99.9 or 100.1, rather than 100.0.

Footnotes are also found throughout the profiles. Instead of repeating each footnote for each profile, we have included the footnote only once in this general explanation. Please read the following footnotes before turning to the State and district profiles:

A - Student registration is recorded at the beginning of the year and does not include gains of losses. Three districts (Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1983-84 school year. Therefore, NAs are reported for nonpublic student registration for these three districts for this year.

B, E - The Bureau of Research is grateful to Mr. Larry Goux of the Board of Regents' staff for supplying the projections for school registration for 1984-88. Please note that there are no projection figures for the cities of Monroe and Bogalusa. The projected registration figures for Monroe and Bogalusa are included in the projected registration figures for Ouachita and Washington parishes.

C - The total public school registration figure in the State and parish profiles for 1983-84 excludes postgraduates.

D - The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, nonpublic schools may not report data thus resulting in an undercount of nonpublic students. Three districts (Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1983-84 school year. Therefore, NAs are reported for nonpublic student registration and graduates for these three districts (Franklin, Tensas, and Washington) for this year. Discrepancies exist in several cases between the number of nonpublic twelfth grade students and the number of nonpublic graduates. Since these discrepancies are unresolvable without the cooperation of the nonpublic schools, they are left in the tables.

E - See B above.

F - These totals include special education and postgraduate students. When postgraduate data are available, the postgraduate students are included in the 9-12 totals. Three districts (Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students of the 1983-84 school year. Therefore, NAs are reported for nonpublic membership, adm, and ada, for these three districts for this year.

G - The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, nonpublic schools may not report data thus resulting in an undercount of nonpublic graduates. For example, five districts (East Baton Rouge, Franklin, Jefferson, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic graduates for the 1983-84 school year. Therefore, NAs are reported for nonpublic student graduates for these five districts for this year. Also, discrepancies exist between the number of nonpublic twelfth grade students and the number of nonpublic graduates for some parishes in 1983-84. These districts were unable to resolve the discrepancies due to lack of information from the nonpublic schools.

H - This data were compiled from the Bureau of Student Services. According to this bureau, six districts (Caddo, Caldwell, East Baton Rouge, Franklin, Vernon, and Winn) reported dropouts after the cut-off date for reporting. The Bureau of Student Services did not require these districts to report the ethnicity of the dropouts in these late reports, thus the data are reported as NA.

I - Other professional/technical personnel include part-time classroom teachers, visiting teachers, curriculum specialists, guidance counselors, librarians, media specialists, physicians, nurses, dentists, dental hygienists, social workers, psychologists, student workers, and others.

J - Support staff includes office/clerical workers, crafts/trade workers, laborers, and service workers.

K - The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, nonpublic schools may not report data thus resulting in an undercount in the number of nonpublic schools.

L - School year 1981-82 revenue figures do not include Federal Indirect Costs as in prior periods.

M - The amounts indicated in the bonded indebtedness section are taken directly from the Parish Financial Statements. These statements are not derived from audited figures. Debt service amounts may be indicated as bonded debt in some instances.

N - Total cost of school transportation data was obtained from the Louisiana Department of Education, Bureau of Transportation, and includes data pertaining to R.S. 17:1941 et seq.

O - In Item 19, the districts were ranked in descending order (i.e. from the largest to the smallest) on all categories except one: the ratio of public students to teachers where the ranks were reversed.

P - Current expenditures include only instruction and support services. As Union Parish failed to report expenditures for 1983-84, 1981-82 data were substituted.

Q - Only full-time teachers are counted in computing this ratio.

R - This percentage is based on the number of public high school graduates from the previous year who went on to public four year institutions, private four year institutions, or junior colleges. Iberia Parish did not report this information in 1982-83, so its data are reported as NA.

S - Assistant principals are considered to be administrators in the computation of this ratio. There may be some inconsistency between districts in the reporting of certain individuals as assistant principals or as classroom teachers. This inconsistency in reporting may create variability in this ratio between districts.

T - Per capita figures were not available for the cities of Monroe and Bogalusa. See per capita figures for the parishes of Ouachita and Monroe. Also, note that the 1980 figures have been revised by the United States Department of Commerce and are different from the 1981 figures reported in the 1982-83 Annual Statistical Report.

MEAN SALARY OF ALL FULL-TIME TEACHERS (PUBLIC)	$ 18,416	$ 18,400
RATIO OF TEACHERS TO ADMINISTRATORS (PUBLIC) S	10.72:1	10.22:1
ASSESSED PROPERTY VALUATION PER STUDENT IN AVERAGE DAILY MEMBERSHIP	$ 12,342	$ 12,976
PER CAPITA INCOME T	$ 9,778 (1981)	$ 10,231 (1982)

*** FOR O, P, Q, R, S, T SEE SCHOOL DISTRICT PROFILES GENERAL EXPLANATION ***

ADDITIONAL EDUCATIONAL STATISTICS

NUMBER OF SCHOOLS PARTICIPATING IN ADVANCED PLACEMENT PROGRAMS	39
PERCENT ATTENDANCE OF MEMBERSHIP (PUBLIC)	94.2
NUMBER OF COMPUTERS FOR INSTRUCTION (1982-83)	1,397
SCHOOLS ATTAINING CRITERIA OF EXCELLENCE	129
NUMBER OF FOREIGN LANGUAGE/SECOND LANGUAGE SPECIALISTS	278
RATIO OF FULL-TIME TEACHERS TO TEACHER/LIBRARY AIDES	487.8 :1
PERCENTAGE OF 9-12 STUDENTS ENROLLED IN VOCATIONAL EDUCATION PROGRAMS	66.8
